"THE ES ES A ER MA ES ER.

From the Genesce Farmer.

Farming on Twenty-one Acres of Land. Many of the cultivators of the soil, who time to prepare for winter. occupy large possessions, do not realize the amount of labor that can be profita- stock, threshes his grain and provides fubly employed in cultivation; and few farm el having none on his farm. The orchard laborers are aware how small a piece of is planted by the fences, around the farm ground will afford full employment to an and door yard. industrious man, and yield himself and;

an account of farmer B. His farm con- sons to settle near you, divide your poseseists of 21 acres; one acre is occupied sions with them, and teach them to realfence all around it, but no division fences. ment in old age, than large possessions He has 57 rods of patent fence, which is with a princely mansion, even if it is not ensily removed, with which he encloses encumbered with debt. one fourth of the ground for pasture.

The farm is divided into four equal parts-five acres in each part. First season, No. 1 is in grass, clover and timothy. for pasture; No. 2 in hoe crop-one acre in wurtzels, one potatoes, and three in corn; No. 3 in barley, and No. 4 in wheat. With these crops he keeps a regular rotation each year. Second season, No. 1 is manured with all the manure that he has collected in the past year, and is plowed for the next year's hoe crop; Y virtue of an order of the Orphans' Court of the County of Clearfield, No. 2 is plowed in the fall for barley next will be exposed to spring; No. 3 (barley stubble) is sown with wheat; and No. 4 (wheat) is sown with timothy and clover for next season's pasture-which rotation he uniformly pur-

He keeps a yoke of oxen, 2 good cows, 20 ewes, and a breeding sow, for which five acres of fresh clover, on a rich soil, will afford plenty of pasture, provided that he does not turn into it too soon in the spring. The wheat and barley straw. corn stalks, and roots will be ample forage for them in the winter. He is industrious, economical and prudent. Every thing is well done and in season. The ground is kept clean, no weeds being allowd to grow not even around the fence; it is made arich by plentiful applications of manure, which renders it very productive. His wheat averges 30 bushels per acre. It will take 24 bu. to bread the family the year, which consists of himself, wife, and four little ones, and it will take 7 bu. for seed, which will leave 119 to sell; this at \$1 per bu. will make \$119. His barley yields 50 bu. to the acre: it will take 8 of it for secd, and 192 bu. to market, at 50 cents per bushel, will be \$96. The corn averages 60 bushels, per acre it will take 80 bushels to feed his pigs, and fat the pork, and the use of the family, (for they eat Johny cake and mush) which leaves him 100 bushels to market at 50 cts. per. bushel is \$50. The potatoes and beets are all used at home. The wool of 20 ewes averaging \$1 per fleece, will be \$20. By taking the lambs from the ewes early, the latter will get fat by fall; 15 of them are sold for \$3, with which he produces 20 ewes for next season's keeping and he has 5 fat sheep for the use of the family,

The sowshave six pigs the last of March or early in April. the five pigs and the old sow when fattened will make 1100 lb., of pork, 500 will do the family, with the five fat sheep, and leave 600 pound to sell, which at 5 cents a pound is \$30. This 340 worth, sold from the products of the twenty acres and the family have had their living the past year.

It may be thought this calculation is too. large for an average production, but I assure you that if the operator is industrious, economical, and judicious, he will seldom fall short of the quantity stated.

But it is asked how can an industrious man be constantly employed on 20 acres of ground, cultivated for farming purposes? Look at it. His ground for spring crops is all plowed in the fall. On the first day of April he commences operation for the season. He firsts sows the grass seed on the wheat; and then 10 cwt. of plaster on the hoe ground; and as soon as the ground is sufficiently dry, he harrows it and sows the barley, then harrows and cross harrows it, until it is thoroughy pulverized, and then rolls it. By that time the planting ground is ready to harrow, which operation is continued until the ground is thoroughly pulverized, and the nearer it can be made to a garden the better. But Victoring GOODS must now cease in Curwens is he is about of the greece with his world. if he is ahead of the season with his work, if he is ahead of the season with his work, whence he might estentiationally parade before the vy Wooden and Cotton and fine Merino Shawls, plain and the can always have full employment in public the hollow and deceptive boast of having the its extensive and will be sold much under the usual prices. making the manure heap. He collects everything that will make manure that his persons who may favor time and means permit; he puts on at least a ton of plaster at different times. Leachen ashes; swamp muck, marl, dirty increase the manure heap to at least 200 best quality every thing likely to be in demand in

The ground being in good order, and the season favorable, he commences planting the first of May, and takes time and does it well, for there is more loss by careless planting than would pay for four times the labor of doing it well. He firsts plants the wurtzels, then the potatoes and corn. Planting done, the wheat is to be wed as soon as the wurtzels are up, he commences hoeing, which affords him employment until the first and perhaps the fifth of July. He then has some leisure, and assists a neighbor in having, to procure help in hauling in grain.

He commences harvest as soon as the Tetty green. If it is not sufficiently

When all are secured, he takes out the manure, spreads it evenly over the surface and plows it under. The hoe ground is also to be plowed for barley next spring, which keeps him pretty close until it is

In winter le takes good care of his

Now my young friends, be industrious family the comforts of life, and make them and saving, and you will soon be able to In illustration of these facts, I will give have large possessions, and wish your

00-CO

HE Public are respectfully informed than C. L. JONES has received a very large Stock of

with buildings, yards, and garden, and teach them, and teach them to real-twenty acres are for cultivation—all made productive by thorough draining and bountiful manuring. A good substantial bountiful manuring. A good substantial small, will afford more rational enjoy-price of goods in Clearfield county. This certainly offers great inducements to cash autress; with the addition of many other goods not brought before to this place. A list of articles is berewith furnished, with the prices; and an examination of this extensive state is invited before purchases are made elswhere. At this store goods will continue to be sold at least 20 per cent, lower than can't be had a sewhere, or less than one-half the analysis of the sold of the continue to be sold at least 20 per cent, lower than can't be had a sewhere, or less than one-half the analysis of the sold of the continue to be sold at least 20 per cent, lower than can't be had a sewhere, or less than one-half the analysis of the sold of the continue to be sold at least 20 per cent, lower than can't be had a sewhere, or less than one-half the small, will afford more rational enjoy-price of goods in Clearfield county. This certainly offers great inducements to cash autress; wind amount to enough to make it a matter of price of goods in Clearfield county. This certainly offers great inducements to Cash Buyers: the saviving of so large near centage, even on a small purchase, with amount to enough to make it a matter of consideration. There are many who deal in Lewistowa in the old inshioned way, by trading thus giving the storekeeper the advantage of high prices—to such I would respectfully ask before making trades with the other stores to call and see my goods and hear the low prices, and I am confident that such will see the advantage of setting their produce and buy goods for cash. In a market like this, if a slight effort be made, all kinds of Country I reduce can be disposed of for cash; it only requires a little independence and determination on the part of the seller, as the home consumption of produce in Lewistown of lore ask.

of for cash.

Since I commenced I usiness in this place, on the cash system, I have sold a large amount of goods, and my business is daily increasing. The public appreciate the advantage of buying for cash, & where business is done for cash only, as there is no risk to run, of credit or trade, the goods are sold at a small cadvance on cost prices; and the city purchases being made for cash only, and with a lengthened experience in business, on Market Street, Philadelphin, enables the subscriber to buy, beyond a doubt, lower statinetts, than other merchants. I am convinced that there are a great many who would like to deal with me and get cheap goods for each if they only could command cash for their produce, to such I say self cheap and self-for cash only. Now for the list of goods on hand:

DRYGOODS.

CLOTHS-black, blue, brown, invisible green, and olive, French, German and American, at all Linseys—Brown, White, Fancy, prices from \$1,00 to 6,00 per yard, including a good assortment of Over Coat Cloths. I will positively sell such goods at greatly reduced prices. On Cloths, Cassimeres and Vestings store-keepers invariable live profits as the nurchassers are not often indeed of these articles. by make large profits as the purchasers are not often judges of these articles. I will not so impose but sell them as I sell other goods at a very small advance on cost. FOURTH DAY OF FEBRUARY, 1850, the 61s but here is a large printing as the participaters are not often judges of these arricles. I will not so impose.

In the first here is I self them as I self other goods at a very small advance on cost.
