VONDERFUL SCIENTIFIC

DISCOVERY.—At the present time thoughtful shinds everywhere are looking for the revelation of new and important discoveries in science, and when a theory is presented claiming to have discovered new light and to have removed the veil of obscurity from a subject of the highest importance, upon which much has been written, it is proper that the claims of this theory be presented and carefully examined and tested, which is destined to transcend in importance to suffering humanity, all other discoveries, the lightning rod and telegraph not excepted. We hold that the human system is but a galvanic arrangement, with its acids and alkalics, constituting the positive and negative forces, and that every mental and physical manifestation, either voluntary or involuntary, is the result of this antagonism; that digention, circulation, secretion, and excretion are wholly attributable to the law of electrical influences; that the nerves are the conductors of Electratory, and that there is a polar action established through the nervous system which connects with every part of the body, establishing and preserving a proper balance of the electric element, which connects with every part of the body, establishing and preserving a proper balance of the electric element, which connects with every part of the body, establishing of disease—the one positive, the other negative; and as Electractry possesses these two inherent principles, it will, if applied according to the electric polarities and requirements of the system, arrest, or, in other words, neutrolize the disease by the restoration of principles, its will, if applied according to the electric polarities and requirements of the system, arrest, or, in other words, neutrolize the diseases by the restoration of principles, its from decomposition the intent electricity is set free, and that though the electrical polarities of the nervous system all changes are produced either for good or or evil; that
