GOSSIP WITH OUR FRIENDS.—I have once more been amid the ashes of old Chambersburg, and have soiled my fingers in rooting among the debris, obtaining as precious relics sundry broken teacups and plates, glass goblets, and con-fused masses of bottles, nails, door knobs, locks, keys and lamp stands—trifles in themselves, but how priceless to the homeless, but thank God, not friendless. Let any one search through the mass of cinders and bricks, all that is left of his once happy home, and see if he can pick up any little thing, however defaced, if recognizable, with which there may be some association, whether it be the baby's doll, or the marble topped table upon which one or more children may have lain for the last time before being placed in the coffin that hid them forever from their parents' eyes. It is sad beyond description; and as anxious as we may be to have the houses rebuilt, yet we know the homes are gone, and we feel it to be almost sacrilege to have the shapeless mound of ruin removed—like the removal of a tablet from the grave of one dear to us. Thus the stir and bustle incident to rebuilding has something repulsive in it; for—black and dead, in a few short years the young will have forgotten the bitter story, and the old will die, their deaths hastened by the terrible calamity; and the whole history will occupy one paragraph, "In the year 1865, July 30, Chambersburg was fired and destroyed by a body of Rebels, under command of General McCausland." Your gossip has taken notes by the way, and thinks the rising generation is not inclined to trouble itself even now about the condition of the town; for happy faces and merry laughs and gay dresses meet him at every step. Perhaps it is not that, but that it gratifies upon the thoughts of one who looks back. Well, well, let it go, the sooner the old folks are laid aside, the sooner will the town be itself again. Alas! Alas! never, never—a town again—that is better. Will the old trees grow again, the old rose bushes and honeysuckles put forth, the rare old ivy be green, the cedars that grew before the town was in existence, will these same ever make us happy or give us shelter or make us swell with pride again? Let the young enjoy themselves, and old folks will need unostentatiously, and will remind each other of our losses, not of our associations, that are gone forever. And as we repeat our Jeremiah, we cannot help point to a tree "planted by a forerunner's hand."

But I suppose the wishes of the old folks will not be regarded, and changes will be made; and if changes must come, I do hope that better, instead of worse houses will be erected. Already have some buildings of the accidental order of architecture gone up—only to tumble down, in the first high wind. Taste costs nothing—indeed it often saves money. A good two-story house is cheaper than a poor one of three; it is desirable that doors should shut, and windows slide; a house with a leaky roof is dear at any price; a serpentine wall is undesirable, either for beauty or safety; green timber indicates a similar mental condition in the builder; convenience is always economy, in the long run; and above all, it is not fair or honorable to rear a tumble down shanty along side of your neighbor's handsome mansion; for by doing you injure his property as much as he has enhanced the value of yours. Temporary houses have been allowable under the circumstances; but they should all come down when the necessity is past.

We should all feel truly grateful to the Trustees of the Academy for protecting the grounds with so substantial a fence; for the beautiful yard ran a risk of returning to the commons if had been a "free street." Doubtless the Academy will be rebuilt when the proper time comes.

The occupation of Richmond, the surrender of Lee and Johnston, and the capture of Jefferson Davis, have given new zest to the old town, and the sound of hammer and saw lasts the livelong day. If only Uncle Samuel would give us a little help, we could soon show the world how much recreation there is in Americans.

Yes, the war is over. Now who doubts that the roar of Niagara is the rattling of the American Eagle's wings; that the lakes are his wash-pots; that the Rocky Mountains were made for his resting place; that thunders are but the sound of the flapping of his wings, that the lightning is the flashing of his eyes. The London Times will please copy. Already we hear of Europe shriek with Trabb's boy, "Hold me, I'm so frightened!" John Thomas Fitz Gerald (some say his name is Gerald, and that his wife is rather high minded, gave him "Fitz") visited me last evening, looking very low spirited, and handed me the following for publication "in our esteemed journal."

A LADY'S EPIGRAM—BY A LADY. You can't, I can; you will, I'll not; I am; You won't, I will—I'll not be still; You may not, I may; I'll strike dismay Where'er you go, with sounds of woe; You "yes," my "no," your "read," my "do." I'll scratch, and bite, and scream, and fight. You'll ask, I'll tell; you'll engage my soul; You'll say, "I faint," I do; Unless I fly,—Thus argue I. "John Thomas, beware!"

I have not heard from my southern correspondent this week, though I hear she landed safely at Fortress Monroe. New York, May 29, 1865.

THE FOURTH OF JULY.—Our National Sabbath is rapidly approaching, and will be at hand five weeks from next Tuesday. It will be the eighty-ninth anniversary of our independence, and should be celebrated in a manner that will never be forgotten. We have a great deal to celebrate. The close of a long and bloody war, which has cost us millions of money and thousands of lives, and which has been the source of the greatest joy to all patriotic hearts. We have also to greet the thousands of our fellow-citizens, fathers, husbands and brothers, who have been absent since the beginning of the war. In view of all these things, we should have on the Fourth of July next, a regular old-fashioned celebration. In years gone by what a glorious day the "Fourth" was! It was the one great day of the nation: a day upon which everybody rejoiced.

And at this time we can feel more than ever that ours is a great country, the most powerful on earth, having withstood the shock of an internal warfare. Then we felt that our country was powerful because it had beaten off foreign foes and had thrown off the yoke of England. Now we know that it is truly powerful, inasmuch as it has conquered the evil portion of ourselves, has asserted the power of our Constitution. Let us have a good celebration, let every one feel that the Fourth of July comes but once a year; and such a one as that of 1865, never before. Let every one join in and have a day not soon to be forgotten by any who participate in its celebration.

IN MEMORIAM.—When the history of the brave Union soldiers who furnished out their lives at Andersonville, Georgia, is fully written, among other names name and memory we cherish, will be that of Wm. U. Bayne. He was a member of the Typo fraternity, and was employed for some time in the News Office. In June, 1863, he was captured by the rebels, and was confined in the prison at Andersonville, Georgia. He was one of the few who survived, and returned to his home in Chambersburg, Pa. He died on the 31st of May, 1865, at the age of 35 years.

PREY & FOLTZ, AGAIN.—This inimitable Hat firm, lately returned from the eastern cities, where they had gone to lay in another supply of Hats and Caps, have also purchased a large stock of Boots, Shoes and Gaiters, which they opened to public inspection on Monday last. Their assortment is large and well selected, and having purchased at very low rates, they can sell lower than any other establishment in Chambersburg. Persons who are in need of either head or foot gear should call on this new and enterprising firm. See their advertisement in another column.

SPRIOUS ACCIDENT.—Rev. Joseph Clark, on Monday last, met with quite a severe accident. It occurred while he was attempting to adjust a chain with which some logs were fastened upon a wagon. By some means his arm was thrust between the wheel of the wagon while it was in motion and the logs, and was broken and otherwise severely injured. The injuries are extremely painful, but we are glad to learn that no serious result is apprehended.

PRINTING.—The Jobbing department of the REPOSITORY is supplied with all the modern facilities for doing all kinds of printing, plain or ornamental, in the best style and prompt to order. All improvements calculated to facilitate business are promptly added, as it is our aim in all the departments of this establishment to keep up with the progress in "the art preservative of all arts."

WE would remind our readers that to-morrow (Thursday), is the day set apart by the President for humiliation and prayer. The day will be observed in this place by a general suspension of business, and religious services will be held in the different churches.

IN consequence of the injuries sustained by the Rev. Jos. Clark, he will be unable to preach to-morrow. There will therefore be no services in the Presbyterian church.

RELIGIOUS EXERCISES will be held in the Methodist Church on to-morrow (Thursday) at 10 o'clock, A. M. Preaching by the pastor, Rev. S. H. C. Smith.

J. R. CLIFFINGER and J. A. THOMPSON have purchased the well known and popular PHOTOGRAPH gallery, on Second street, opposite Fry & Foltz's Hat and Cap Store, and have secured the services of a first class operator from the city, who has been engaged in some of the most successful galleries in the country. They are determined to leave their gallery, the very best in the city, to the hands of a good operator, and with the advantage of a good light, and a good operator, to give the best work for the money. They are determined to give the best work for the money. They are determined to give the best work for the money.

THE LUNGS.—The cold and changeable weather tolls terribly on those who have weak and diseased lungs. Many are suffering at this time with affections of the bronchitis, becoming very chronic, and some are predisposed to Consumption. Those who are predisposed to Consumption, should avoid all colds, and all exposure to cold winds. They should also avoid all exposure to cold winds. They should also avoid all exposure to cold winds.

GELWICKS & BURKHART have returned from Philadelphia and New York with a new and very heavy lot of goods. It is their determination to make this business by selling great quantities of goods, and not by large profits. They are determined to give the best work for the money. They are determined to give the best work for the money.

ANDREW CORDIAL, the Mother's Friend and Child's Comfort, is a safe and reliable medicine for all ailments of the young. It is a safe and reliable medicine for all ailments of the young. It is a safe and reliable medicine for all ailments of the young.

Go to Gelwicks and Burkhardt for confectionery. They have a fine assortment and sell cheap wholesale and retail.

CORRECTION.—The sale of Durham Cattle, advertised in our columns for several weeks past, takes place on Wednesday, the 21st of June, instead of the 20th.

THE THIRD SERIES OF 7-30'S.—The great success of the 7-30 Loan must always be looked upon as one of the most powerful arguments in favor of the United States Government, and of its strong hold upon the confidence and affections of the people. On Saturday, May 13th, the subscriptions were over thirty million dollars, and for the week ending on the 20th, the amount was over twenty million dollars.

AN INTERESTING DOCUMENT.—The original ordinance of secession of the State of Virginia has been secured by a respectable German residing in Philadelphia. The document is signed by some eighty odd of the most prominent rebels of the State, and is a valuable relic of the rebellion. It is a valuable relic of the rebellion. It is a valuable relic of the rebellion.

THE BRIDAL CHAMBER.—A note of warning and advice to those suffering with Seminal Weakness, General Debility, or Premature Decay, from whatever source produced. Read, ponder, and reflect! Beware in time.

WHY INjure the Complexion by Powders and Washes which choke or fill up the pores of the skin, and in a short time leave it harsh and dry? It is in the blood, and if you want moist and healthy skin, use the Blood Purifier of Sarsaparilla. It gives a brilliancy to the complexion, and an elasticity to the skin.
