were made simultaniously to pierce through it. But the layer baving been entirely removed by about 8 o'clock, the works of the lateral trench were abant doned. Immediately under the layer thus demolished, we found a sirong slab 6 feet 71 inches long 3 feet wide and five inches thick, forming the interior sare phagus containing the coffin. This slab perfeetly sound, was surrounded by an edging of blocks of stone, and Roman cement strongly fastened to the wall of the vault. This last piece of masonry having been carefully removed, and two bolts having been fixed on the slab, every thing was ready by half past nine for opening the sarcophagus. Dr. Guillard then purified the tomb by sprinkling chlorate of lime about it; and the slab, by order of the English Commissioners was raised by means of a crane, and lodged on the edge of the tomb.

" As soon as the coffin was visible, all present uncovered their heads, and the Albe Coquerau sprinkled holy water and recited the "De Profundis" The Commissioners then descended to inspect the coffin, which they found well preserved ; but a small portion of the lower part, which although it was on a strong slab that rested on blocks of stone, was slightly decayed. Some sanitary precautions having been again taken by the surgeon, an exp ess was sent off to his excellency the Governor, to inform him of the progress of the opreation, and the coffin was drawn up by hooks and cords, and carefully transported beneath a tent raised for its reception. At this moment, the Almoner, received the body according to the rites of the Catholic Church. The Commissioners then inspected the sarcophagus, which was certified to be in a perfect state of preservation, and entirely conformable to the official descriptions of the burial. Toward 11, the French Commissioner had assured himself that his excellency the Governor had authoriz d the opening of the coffin. Conformable to the arrangements made, we removed with precaution the first coffin, in which we found a coffin in lead in good preservaion, which we placed in that which h d been sent rom France. His excellency, the Governor, ac ompanied by his staff, Lieutenant Middlemore, his id de camp and secretary, and Capt. Barnes, major if the place, entered the tents to be present at the pening of the inner coffins.

"The upper part of the leaden coffin was then ut, and raised with the greatest precaution : within was found a coffin of wood, in very good state, nd corre-ponding to the descriptions and recollecons of the persons present, who had assisted at the urial. The lid of the thi d coffin having been if cd, there was found a lining of tin sligh ly exvded, which having also been cut through and ra sed, lowed us to see a sheet of white satin, this sheet as raised with the greatest precaution by the hands the doctor only, and the entire body of Napoleon speared. The features had suffered so little as to immediately recognized. The different objects posited in the coffin were remarked in the exact sitions were they had been placed; the hands ire singularly well preserved ; the uniform, the ors, the hat but little changed . the whole person, fact, seemed to indicate a recent inhumation .e body remained exposed to the air for only, at st, the two minets necessary for the surgeon to e the measures prescribed by his instructions in or-/o preserve it from all fur her alteration."

Transportation Line

TO BALTIMORE. (VIA TIPE WATER CANAL.)

Warehouse foot of Chesnut Street on the Pennsylvania Canal.

A BOAT leaves the wharf of the subs riber every morning at 8 o'clock, running through to Baltimore in three days. Consignments of produce, iron, &c., will receive a despatch by this line, which has not hitherto been equalled by any other. Rate of freight as low as by any other regular line.

References: JOHN W. BROWN,

BUCK & HERR.

KERNAN & STILLNIGER, Baltimore. J. & A. II. HERR.

Goods intended for Pittsburg, or any point on the Pennsylvania Canals, will be shipped without delay on their arrival at Harrisburg, as this connects with the North American line of Portable Boats to Pittsburg daily, and with the Susquehanna Packet Line to Northumberland, Williamsport, Wilkesbarre, and all intermediate places. GEORGE W. LAYNG.

Harrisburg, Sept. 9, 1840.

#### Works of Nature.

IN a state of heaith the intestinal canal may be compared to a river whose waters flow over the adoining land, through the channels nature or art has made, and improves their qualities; and to keep up the comparison of the river, so long as it runs on smoothly the channels are kept pure and healthy; but if by some cause the course of the river is stopped, then the water in the canals is no longer pure, but soon becomes stagnant. There is but one law of circulation in nature. When there is a superabundance of humorial fluid (screeity) in the intestinal tubes, and costiveness takes place, it flows back into the blood vessels, and infiltrates itself into the circulation. To establish the free course of the river, we must remove the obstructions which stop its free course, and the e of its tributary stream. With the body, follow the same natural principal ; to move, by that valuable purgative medicine Bran-dreth, s Universal Vegetable Pills, which are an eff ctual assistance of nature, the superabundance of humors in the intestine canal. By persevering in this practice, the ways of the circulation will then be restored to the full exercise of their natural functions, and a state of health will be firmly establish. Remember, never suffer a drop of blood to be taken from you --- Evacuate the humors as often and as long as they are degenerated, or us long as

you are sick. Dr. Brandreth's Office in Philadelphia, is at No. 8, NORTH EIGHTH street, where his pills can be MADEIRA WINE .-- First quality Madiera had at 25 cents per box, with full directions.

TOnly agent in Sunbury, is H. B. Masser Esqr. Sunbury, Sept, 9, 1840.

#### Certificates of Agency.

THE following are the duly appointed agents in their respective counties, for the sale of Brandreih's Vegetable Universal Pills.

#### THE CAUSE OF DISEASE.

Nearly all classes of disease, are caused by some obstruction in the system, which prevent the regular and wholes me operation of the animal functions. This state of the system, is disease, which is manifested in a variety of forms, more or less malignant in their character. To restore the system to a state of health, then, it is only necessary to remove the cause of disease, and the end is accomplished. The cause is obstruction somewhere. This an be removed by purgation, which is the only means that should be resorted to, because, suggested by reason, and by nature. Dr. Harlich's Strengthening and German Aperient Pills, are allowed by the thousands who have used them, to be the best purgative medicine in existence. Because, they not only remove all obstructions, and purge the system of its impurities, but, because, and which is extremely important, strengthen and give proper tone to the stomach, and produce a healthy action of all the parts. Besides, they are so mild and gentle in their operation, as to reader them at all times a perfectly sufe and desirable remedy. The afflicted would do well, then, to purchase a box or two of this invaluable medicine, and give it a fair trial, instend of destroying their systems with off-repeated doses of calomel, and other drugs, so injurious to human life and happiness,

# make known the same to them without delay.

#### TO THE COMMUNITY.

THE success which has attended the use of De-Harlich's German Aperient and Compound strongthening Tonic Pills, 15 truly astonishing. It is no vain boast to say this medicine has proved by its happy effects in the cure of a variety of diseases to which the human frame is fiable, to be vastly subefore the number of the probability of the public. Many of these preparations are compounded by in-dividuals who are positively ignorant of the myst-ries of the burean system, and more pretenders of medical knowledge. Dr. Harlich, however, is celebrated among the German faculty as a man of the highest scientific attainments, and equally distinguished throughout Europe, as a successful medical practitioner, spent most of the years of a useful life in the aquisition of such knowledge as might prove beneficial to his fellow creatures. In the pills which he invented, and which bear his name, the public are assured of an article that possesses more than ordinary virtues. From the acknowledged tale is of this inventor, nothing less than a good article could be expected; and the experience of many years has afforded demonstration of the virtues of his medicine. In Germany and other parts of Ecrope, its r putation is established. In this country into which it has but been recently introduced, it is rapidly gaining the most substantial reputation. The manerous certificates of cures of the most obstina of discusses effected by the use of Harlich's Pills, which the proprietor is constantly receiving, is proof of the fact. Day after day he receives new testimonicies of their efficacy, and week after week increases the demand for them. This is not mere assertion ; is numerable certificates are open for the inspection of the public, and the doubts of any who are skeptical, can be removed by examining them at the office of

the proprietor. We take the liberty, then, of suggesting to every family, that they make use of Dr. Harlich's Pd's. Let them keep a supply constantly on hand, to be us d when occasion demands, and they will neer ve the most unequivocal proofs of utility .- Medical
