Works of Nature.

IN a st to of health the intestinal canal may be ampared to a river whose waters flow over the adoining boil, through the channels nature or art has trade, and improves their qualities; and to keep up the comparison of the river, so long as it runs on smoothly the channels are kep! pure and healthy; but if by some cause the course of the river is stopped, then the water in the capals is no longer sure. ut soon becomes singuent. There is but one law of circulation in thath e. When there is a superabundance of humorial fluid (serocity) in the intesthal fulls, and confiveness takes place, it if we back into the blood vessels, and infiltrates itself into the circulation. To establish the free course of the river, we must remove the obstructions which stop its fier course, and tho e of its tributary stream. With the body, follow the same natural principal r move, by that valuable purgative medicine Beadreth's Universal Vegetable Pills, which are on effictual assist nec of nature, the superabundance of humors in the intestine canal. By per evering in this practice, the ways of the circulation will then be restored to the full exercise of their natural functions, and a state of health will be family establish Remember, never suffer a drop of blood to be you are sick.

ASTONISHING INCREASE. FOUR THOUSAND NEW SUBSCRIBERS

IN TWO MONTHS!!! WHEN we first purchased the old and

known establishment of the Saturday Evening Post,

we stated that the paper circulated so widely a-mong the steady, reading portion of the United States, that we entered upon our labors with full confidence of the future. Our success has since been beyond our most sanguine expectation, as our weekly receipts overbalance those of any cotemporary paper. Our lost has continued to swell up, with unexampled rapidity, and we have the confi dence, that at the present rate of increase, we shall be enabled in a few months to boast of more than 5,000 subscribers! When we cam senced our abors, we announced distinctly, that the tone of the paper should be decidedly moral, and that nothing should be admitted into our columns, which the most fastidious father could disapprove of, and determ ned that as an approved Family Paper, it should not contain a paragraph, with the spirit of which a parent would not wish to have a daughter familiar, and we therefore, with this view, announced that no theatrical notices should appear in our olumns, and that we should be opposed to theatres as things calculated to injure the healthy action of an honest mind,-as creative of exhibitions demoralizing in tendency, and fearfully permeious in fact. There were not wanting blusterers, who more matter than the Brother Jonathan. This made a great parade of opposition, and Croskers, who predicted our speedy downfall, but we threw ourselves upon the sober, rational and experienced portion of the people of the United States for sup-

We thought and expressed the opinion, that lowever careless many might be upon this subject, three or more times, or otherwise notice the conti that few, even if they did not entirely disapprove of such entertainments, cared about having the gross details forever paraded before the eyes of their children, and the sickening and nauseating Editors: those relative to the buisness deculary of all kinds of characters made familiar to ment, to J.
