TO THE COMMUNITY. THE success which has attended the use of Dr. Luclich's German Aperient and Compound arong thening Tonic Pills, is truly astonishing. It ts no vain boast to say this medicine has proved by he happy effects in the cure of a variety of diseases to which the human frame is liable, to be vasily superior to the many preparations before the public. Many of these preparations are compounded by insividuals who are positively ignorant of the mysteties of the human system, and mere pretenders to medical knowledge. Dr. Harlich, however, is celeunited among the German faculty as a man of the highest scientific attainments, and equally distinwoushed throughout Europe, as a successful medical practitioner, spent most of the years of a useful life the aquisition of such knowledge as might prove temeticial to his fellow creatures. In the pills which he invented, and which bear his name, the public the assured of an article that possesses more than undinary virtues. From the acknowledged talents of this inventor, nothing less than a good article could be expected; and the experience of many years has afforded demonstration of the virtues of is medicine. In Germany and other parts of Euog e, its r putation is established. In this country to which it has but been recently introduced, it i rundly gaining the most substantial reputation. The a unnerous cert ficates of cures of the most obstinate it - cases effected by the use of Harlich's Pills, which the proprietor is constantly receiving, is proof of the out. Day after day he receives new testimontals of their efficiency, and week after week increases the demand for them. This is not mere assertion; intitumerable certificates are open for the inspection of - it w public, and the doubts of any who are skeptical,

can be removed by examining them at the office of the proprietor. We take the liberty, then, of suggesting to every binily, that they make use of Dr. Harlich's Pilis. i of them keep a supply constantly on hand, to be used when occasion demands, and they will receive the most unequivocal proofs of utility .- Medical

IN a state of health the intestinal canal may be ompared to a river whose wate s flow over the adoining land, through the channels nature or art has made, and improves their qualities; and to keep up the comparison of the river, so long as it runs on smoothly the channels are beat pure and healthy: but if by some cause the course of the river is stopped, then the water in the cauels is no longer pure. out soon becomes stagnant. There is but one law of circulation in nature. When there is a superabundance of humorial fluid (scrocity) in the intestinal tubes, and co-tiveness takes place, it flows back into the blood vessels, and infiltrates itself into the circulation. To establish the free course of the river, we must remove the of structions which stop its free course, and tho e of its tributary stream. With the body, follow the same natural principal; remove, by that valuable purgative medicine Brandreth,s Universal Vegetable Pills, which are an eff ctual assistance of nature, the superabundance of humors in the intestine canal. By persevering in this practice, the ways of the circulation will then be restored to the full excreise of their natural functions, and a state of health will be firmly establish ed Remember, never suffer a drop of blood to be and character, and are produced from ulcers or taken from your-Evacuate the humors as often popularity of the Magazine Papers may be expect-

GRAHAN'S MAGAZINE. Ladies' and Gentlemen's World of Literature and Fashion.

(The Casket and the Gentleman's United.)

NEW Volume, under the above title, of the we'l established and fashionable Magazine, The Philadelphia Casket in conjunction with the Gen leman's Magazine, which has been every where pronounced the most readable and popular of the day, will be opened on the First of January, 1841, with an array of Contributors secured by the union of talent and fame, which no periodical in the country can boast or pretend to rival. The December number will, however, be a spicimen of the new volume. The Volume will be opened with a new and beautiful type, the finest white paper, and with the first of a series of embellisaments unsurpassed by any which have yet appeared in any Magazine. The style of elegance, the beauty and finish of these illustrations, and the extensive improvements which will be made in its typographical appearance, and above all, the tone of its literary department, by the bril innt array of contributors, whose articles have enriched the pages of each number, will give it character, second to no Magazine in the Union. The character of the articles which shall appear in its pages, will be equally removed from a sick y sentimentality, and from an affectation of morality, but while a true delincation of human nature in every variety of passion is aimed at, nothing shall be found in its pages to cause a blush upon the check of the most pure.

The Laterary character will be sufficiently guaranteed by the reputation of both Mogazines thus united, for years post. Writers of the first rank have been regular Contributors to their pages, and the tales and sketches published in them have Leen wid ly copied and read, and the firm and independent tone of the criticisms, upon the current literature of the day, has been every whe e approved and commended. The list of contributors embraces the names of most of the principal writers in America, with a respectable number of English authors.

The series of well known nautical papers, entitled . Cruizing in the last War," have had a run. unequalled by any series published in any Magazine for years .- The author promises to open the first of a new series of Tales of the Sea, and from his known abilities as a depicter of sea scenes and life, much may be relied upon from him in maintaining the ed during the volume, also from the author of the well known articles, entitled "The Log of O.d Ironside." The author of "Syrian Letters," will also S, NORTH EIGHTH street, where his pills can be lend his powerful and grateful pen, to sustain and increase the reputation of the work,-The valuable aid of the au hor of "Leaves from a Lawyer's Port Folio," has also been secured, and we may expect something stil more thrilling from the capacious stores which a long life in the profession has enabled him to amass. An occas onal Chit-Chat with "Jemmy Short," and "Oliver Oldicilow," is also promised; with a variety of choice articles in prose and verse, from various writers of celebrity, as contrabutors to the prominent Magozines of the country. The editors of both Magazines continue their ervices under the new arrangement. With such an array of talent a Magazine of unrivalled attractions, may safely be promised the coming volume. FASHIONS AND ENGRAVINGS.

In compliance with the almost unanimous wish of our lady subscribers, we shall the ensuing vo'ume furnish them with a beautiful and correct plate of Fashions Monthly, a feature, it is believed, that will neither be unwelcome nor unpopular. stated that the paper-circulated so widely a mong the steady, reading portion of the United States, that we entered upon our h bors with full confidence of the future. Our success has since been beyond our most sanguine expectation, as our weekly receipts overbalance those of any coten-potary paper. Our let has continued to swell up, with unexampled rapidity, and we have the confi dence, that at the present rate of increase, we shall be enabled in a few months to boast of more than 35,000 subscribers! When we commenced our labors, we announced distinctly, that the tone of the paper should be decidedly moral, and that nothing shou d be admitted into our columns, which the most fastidious father could disapprove of, and determined that as an approved Family Paper, it should not contain a paragraph, with the spirit of which a parent would not wish to have a daughter familiar, and we therefore, with this view, announced that no theatrical notices should appear in our columns, and that we should be opposed to theatres as things calculated to injure the healthy action of an honest mind,-as creative of exhibitions demoraiizing in tendency, and fearfully permitious in fact. There were not wanting blusterers, who made a great parade of opposition, and Croakers, who predicted our speedy downfall, but we threw ourselves upon the sober, rational and experienced portion of the people of the United States for sup-

port, and we have been nobly sustained. We thought and expressed the opinion, that that few, even if they did not entirely disapprove of such entertainments, cared about having the gross details forever paraded before the eyes of cology of all kinds of characters made familiar to ment, to their minds.

We determined also, that while the paper continued under our control, it should be strictly neutral in politics, and that as news and literary journalists we had nothing to do with the matter; this

THE LARGEST, CHEAPEST, HANDSOM-EST, AND MOST COMPREHENSIVE NEWSPAPER IN THE UNITED STATES.

EDITED BY PARK BENJAMIN AND EPES SARGENT

WITH multiplied resources for rendering the NEW WORLS more valuable than ever as compendious newspaper and repository of elegant

literature, we enter upon the second volume (folio) on the 24th of October, dressed in a beautiful garb of new type, cast expressly for the purpose. It will therefore be a fitting time to commence new subscriptions, as well as for the renewal of those which may then expire.

During the first year of the existance of the NEW WORLD, it has acquired a reputation and circulation superior to any weekly paper in the country; and has furnished to its subscribers, during that period, (besides a I the current news of the day domestic and foreign) new and valuable works by Talfourd, D'Israeli, Thomas Moore, Miss Mitford Mrs. Jameson, C. Dickens, Ainsworth, Knowles, Bulwer, Marryat, and others-works, which in London could not be purchased for fifty times the amount of the subscription price of the New World. In addition to works of interest by these eminent authors, it has contained the cream of the periodical literature of the day, as well as original articles from the pens of some of the most popular writers of America, among whom we may mention Miss Sedgwick, Orville Dewey, Professor Longfellow, the author of "Yankce Notions," Simms,

Street, &c. &c.

In politicks we shall, as hitherto, maintain an armed neutrality .- Our columns as heretofore will be unobjectionable in a moral point of view. In criticism we shall, in justice to the public, mantain a perfect independence, even though we incur the vengence of all the dunces. We shall, in conclusion, earnestly strive to render our sheet not only worthy of the unparalleled favour it has experianced, but of a continually extending circulation. While we continue to furnish with all possible promittude the most attractive liter ture of the day, we shall,

us our means enlarge, afford that compensation to native authors, which may induce them to inske the New World the medium for presenting to the public their best productions. Our excellent London correspondent will be continued, and due attention will be paid to the comercial, agricultural and news departments of our paper.

A QUARTO EDITION

Of sixteen large pages was commenced on the sixth of Jone last, in order to meet the wishes of large number of subscribers, by giving them its rich and varied contents in a suitable form for binding. This we have done without having enhanced the price, that new sub-cribers, and others on the renewal of previous subscriptions, can take their choice be tween the Quarto and Folio form. (7) But a few sets of the Quarto, from No 1, now remain on hand in the office, and we shall therefore, not be able long to supply them.

THE CULTIVATOR.

A Consolidation of Buel's Cultivator and the Genesee Farmer.

WILLIS GATLORD AND LUTHER TUCKER, EDITORS.

Prospectus of Vol. 8, for 1841.

THE Cultivator was established to improve and elevate the Agriculture of the country ; to give proper tone to the morals and mind of the Farmer; to show him the dignity and importance of his profession ; to store his mind with useful knowledge, and convince him that while all classes are and must be more or less dependant on each other, he alone of the whole can make any near approach to independence. If there is one thing more than another, which in this country gives a man superiority over his fellow men, it is knowledge ; and this knowledge,-knowledge which is as essential to the succees of the farmer as to other men,-it is the design of the Cultivator to aid in imparting.

(J) The volume for 1840, is filled entirely with Original Communications, embracing articles from about 300 Correspondents, from almost every state in the Union.

If an increase of subscription beyond any precedent in the history of Agricultural Journals,-if the almost unanimous voice of the public press in our favor .- if the multitude of private yet flattering testimonials we have received, added to a circulation amounting the first year to TWENTI-TWO THOU-SAND, may be admitted as evidence, then we have certainly most abundant reason to be gratified with the success which has attended the Union of the Cultivator and the Genesse Farmer. No expense has been or will be spared to render the Cultivator worthy of the patronage it has received. In the number, variety and excellence of its Illustrations, it is without a rival at home or abroad, the last volume being embellished with nearly One Hundred Engravings, illustrating the improved breeds of Horses, Cattle, Shcep, Swine, Buildings, Implements, &c., making the Cultivator, all things considered, it is believed, the Cheapest Agricultural Paper ever published in this or any other country.

TERMS-One Dollar per annum-Six copies for \$5-the money to be remitted in advance, free of postage. A commission of 20 per cent, will be allowed to Agents who obtain 25 or more subscribers, and 25 per cent. to those who obtain 100 or more. All subscriptions to commence with a volume.

Postmasters and gentlemen disposed to lend their influence to aid the cause of Agriculture, are respecifully requested to act us agents. Address JESSE BUEL & CO.

THE CAUSE OF DISEASE.

Nearly all classes of disease, are caused by some

obstruction in the system, which prevent the reqular and wholesome operation of the animal functions. This state of the system, is disease, which is manifested in a variety of forms, more or less

malignant in their character. To restore the system to a state of health, tlan, it is only necessary to remove the cause of disease, and the end is scremplished. The cause is of struction somewhere. This and pleasant in its effect-the most certain preserver ' can be removed by purgation, which is the only by reason, and by nature. Dr. Hurlich's Strengthening and German Aperient Fills, are allowed by the thousands who have used them, to be the best not only remove all obstructions, and purge the system of its impurities, but, because, and which is extremely important, strengthen and give proper tone to the stomach, and produce a healthy action of all the parts. Besides, they are so noted and genile in their operation, as to render them at all times a perfeetly eafe and desirable remody. The afflicted would du well, then, to purchase a box or two of feetly stend of destroying their systems with off-repeated

variety of interesting tales, original, from foreign and domestic magazines, together with the valua-He contributions of our own circle of literary friends will continue to give interest to the paper, while everything important and worthy of note that nappens in the Old World or the New, shall be collected and collated for the taste of our readets.

The Ladics' Department shall always be choice and select, and shall receive strict attention, while such things as may interest our juvenile readers, and that important and large class of our readers, the Fairmer will not be overlooked. In order to gratify, as much as possible, the laudible desire of our country readers, a portion of our attention will he devoted to the collection and diffusion of such News, Memoranda, Tables, Facts, Hints, &c. as may seem important to agriculturists, and the population resident without the confines of our great cities The state of the mukets and the fluctua tious in the prices, will be regularly and what is of

more moment, correctly given. We have ever been opposed to the constant iduster and parade made by some editors, about the excellence of their papers, and have resolved that the Saturday Evening Post, shall be conducted, as to speak for itself.

Our readers will always find in its columns the earliest and mest authentic information, rs well as the most choice and entertaining literary matter. We have totally discarded the system of filling the p per wihquack advertisements, but prefer giving ous readers from week to week, entertaining reading matter.

And we feel assured that we shall be no losers thereby, as but few readers care about having a paper filled with descriptions of these nauscating compopula

> PROSPECTIS OF THE

JOURNAL OF THE AMERICAN SILK SO-CIETY, AND RURAL ECONOMIST.

EDITED BY GIDEON B. SMITH.

THIS Journal was established by the American silk Society, for the purpose of diffusing practical nformation on the CULTURE OF SILK in the United States. It has now been published one year, and may be considered a work of standard character.

The first year's publication, comprising the first volume, containes a mass of valuable information. and it will be the object of the editor to make the second equal in all respets, if not superior, to the first. The important fact is now estal lished be yond any question, that the people of the United States can make silk CHEAFER and BETTER than any other nation upon earth. It has been proved by unimpeachable test mony, that the entire cost of producing silk ready for market, does not exceed TWO BOLLARS AND TWENTY-FIVE CENTS PER FOUND, and its lowest value is FOUR DOLLARS AND FIFTY CENTS; also, that ONE ACRE of ground plant d in morus multicaulis, will produce the first year the trees are planted, FOURTY-FIGHT FOUNDS OF SILK, leaving a clear profit to the producer of ONE HUNDRED AND LIGHT DOLLARS ! It has also been proved that the children and females of any former's family can, with the greate-t possible case, produce from fifty to a hundred pounds of silk every year, without any cost whatever to the expenses of the form after the trees are planted; and therefore, that the whole amount of silk will be so much clear gain, say from \$225 to \$450. With these facts we submit to an intelligent people wether it is not a great and important object for them to introduce the culture of silk in every farmer's family in the Unioa. To enable all our farmers to make sick, the Jour-NAL OF THE ANDRICAN SILK SOCIETY' Was established; it contains plain practical directions for cut-TIVATING THE TREES, PREDING and REARING SILK wouns, REELING THE SILE, and preparing it for market, &c. besides all other information that can be required to enable any person to enter upon the business, either on a large or small scale. Every triend of his country, into whose hands this paper may fall, will be doing a patriot and philanihropist's work by inducing his friends and neighbouts to enter their names upon the list of subscribers,

The Journal of the American Society is published monthly, in pamphlet form ; each number contains thirty-two octavo pages, printed on new type and

handsome paper, with a printed colored cover. TRAMS :- Two dollars a year, or six copies for ten dollars, always to be paid before the work is sent. All subscriptions to begin with the first number of the year, and in no case will the work be sent to any subscriber longer than it shall have been paid for.
