Editorial Miscellany.

Capt. Smith of the U. S. Ship Columbus, has received a pair of gold epatiletts, and each of his Lieutenants one 'for their efficient services in aiding to remove the Steam Ship Columbia to a place of safety from 'Curard wharf, at the time the fire occurred there a few months since.

The amount of flour received and manufactured at St. Louis last year, in estimated at 150,000 bar-

The Banks of Maryland, in answer to a committee by the Legislature, say that they can resume inous to the country. They would rather wait upon the Banks of Pennsylvania and Virginia.

The Philadelphia Tow Boat company have done so fine a business fast year, that 'they recomend'a daily line for the present year.

The trial of Colt, for the murier of Adams, excites a great deal of interest at New York. Bennet of the Herald published a picture of the dead body of Adams in his paper, with the title of "Samuel Adams before he was cut up and salted," of which the council of Celt complained to the court.

Bryant, the Poet, has been lecturing on Homopathia at New York.

Horace Binney has been nominated for District kinson, deceased.

Boston. She was 102 the 27th of October last. She had three husbands, but no children.

According to the Miners' Journal, not more than 15,00 or 20,00 toms of coal will be transported on the Rail Road to market this winter. The people of Puttsville talk of removing the

seat of Justice'to that place, from Orwigsburg.

The last Harrisburg Signal is charged with an unusual quantum of "soft Sawiler."

There is not much difference between a drone and too proud 'to beg-hanging about his friends of assistance. With the exception of a little less pride of character, a loafer is precisely the same.

From the New York Tribune.

LATE FROM EUROPE.

sians over the Russians, &c.

The steamship BRITANNIA, Capt Hewitt, airived at Boston at 5 o'elock P. M. of Saturday, in eighteen days from Liverpool, whence she started on the 4th inst.

By this arrival, we have advices from all parts of Europe, including London dates to the 3d inst., and Liverpool to the 4th. The intelligence is of decided interest.

Lord ASHBURTON, President of the Board of Trade, formerly Mr. Alexander Baring of the great Banking House of Baring, Brothers, is to come out es a Special Envoy Extraordinary from the British Court to Our Government, with liberal powers to adjust all differences between the two Nations. It is understood that he is bearer of approposition from the British Government for the adjustment of the North-Eastern Boundary question; and that he is cessity of effecting some affigustment of the claims of British citizens on cortain of the States composing our Union, which have effected heavy Loans of those citizens, and now neglect or refuse to make provision for their payment From Lord A's character and position, as well as the nature of the case, we can hardly doubt that this subject will be brought to the notice of our Government by him. We hear that he has a preposition to submit, which is intended to remove the grievance altogether.

CHARLES DICKERS, the distinguished author of "The Pickwick Papers," Master Eumphrey's Clock," Ac, with his wife, are likewise among the passengers; siso Lord Mulgrave. Several other eminent Englishmen are preparing to follow; and the emigration of the ensuing spring will be very great, especially of the Mormon converts bound for nau-

From Chios nothing later has been received then has already reached this port.

There had been several shipwrecks on the coast, and several packers had been prevented from sailing by the boisterous weather. The England did no:

saiftill the 18th.

The Liverpool and London papers are highly pleased with the attention shown to Lord Morpeth while in this city. They are spoken of as full of good omen for the preservation of friendly relations. Lord M. is to be brought forward as representative from Dubin, the place being vacated by the recent death of Mr. West.

A dreadful accident occurred on the Great Western Railway on the 18th ult, by which eight pursengers were instantly killed and fifteen or twenty others varigersucky wounded. It was caused by the collission of the engine with a portion of the embankment which had fullen on the track.

RUSSIA AND CIRCASSIA .- Imelligence has been received at 'Constantinopie by way of Trebizond, of a victory gained by the Circassians over the Russians: the most signal and decisive, it is said, that has occurred since the beginning of the war. A large expedition, consisting of thirty thousand men had been-tisembasked on the coast, with a view of destroying the grain, which had been collected by the Circussians after the harvest, when a storm having suddenly risen drove the ships from auchorage. The Circassians, availing themselves of the opportunity, assailed them fiercely on every side, and the Russians, separated from their stores, which had been carried out to sea, were compelled to commense a disastrous retreat through a country con-Anapa, the whole of the thirty thousand were killed off of our public works. or made prisoners; such are the accounts received from Trobizona. Further details of this tremendous disaster of the Eussians are eagerly expected

The Electric Telegraph. One of the most recent gifts which Science has conferred uson Ait, is that of the Electric Telegraph,

invented by WHEATSON, and now employed in London. He had devoted to the subject of Electricity much time, and its first fruits was this discovery. The fellowing description of 'the object, operation and construction of this simple, yet highly importent 'invention, we extract from Dr. Land-NER's Third Lecture, delivered in New York, and reported at length in the New York Tribune :

Its object is, by the agency of Electricity, 'to communicate between two distant places in a very immediately, but that such a course would be ru- short space of time. In England it has afready been applied along a railway for some hundred or more miles. All that is necessary is to go to the office at one end and ask his question; in about three minutes receives an answer. I chancell myself while engaged in railway operations, to witness an operation of this kind, and I shall 'not soon forget my astonishment at the result. I was standing near'the office of the Great Western Railroad when a passenger got out of the train of cars, which had just arrived, over forty miles, from London, went into the office and told the clerk that he wished to send by returning train a note to his botel in London concerning a clock and umbrella he had left there. 'Yes, sir,' said the clerk, 'wait a moment and I will give you the answer to your note.' Judge of the U. S. Court, in place of Judge Hop- He turned a small apparatus in a corner of the room, and in about three minutes told the man'that Mrs. Elizabeth Chase is the olifest woman in his clork und umbrella had been taken care of, and will be sent by the next train.

The method of the operation of this invention is extremely simple, and is easily rendered intelligible I have already explained the nature of the galvanic current which is produced when zinc and copper or other thetals are brought in contact. The electricity evolved at the surface of a contact is decomposed, the positive taking one direction and the negative the other; hence if two wires be provided and put in contact, the one with the positive and the other with the negative fluid, these and a loafer. A drone is generally too lazy to work, two currents will flow along them for any distance -even around the globe. New if a magnetic neewithout doing any thing for them, or for himself- dle be placed over the wire, along which this galalways expecting to be helped without endeavor- vanic current flows, it will be immediately turned ing to help himself, or showing that he is worthy at right angles to the wire-no matter what was its former direction. Now suppose a wire be enclosed in these tubes or surrouned by some other non-conflucting substance, and passed the whole distance from New York to New Orleans; a needle placed A Special Envoy from Grent British -- Ar- above the wire at New Orleans will instantly turn rival of Boz-Great Victory of the Gircas- at right angles to it upon sending along it the electric current. This would be the case with any number of wires. Thus we have a method of communicating instantly between distant places, The next thing is to devise some means of rendering the communication intelligible. A variety of signals have been employed for this purpose. In Wheatston's telegraph the letters of the elphabet were employed; and the mode of conducting the communication was this; at each end of the route was provided a lozenge marked off into parellelograms, at the angles of which were placed the different letters of the alphabet.

> Magnetic needles were placed above the wires in such a position with respect to the figures that any two of the needles may be made to point to each of the letters by the action of the fluid, which on being passed along the wires causes them to turn right angles to the wires. Now in comm cating from end to end, the person who makes the first advances, passes a current along a wire which lets go a bell at the other extremity : thus a wire at the Court House. Punctual attendance is re touched at New Orleans would let go a bell here. and its language is, 'I'm woing to send you a message-so look about you. The person receiving this warning sends back a current, which lets go a bell at the other end, saying in reply, 'Go on, sir, I'm listening to you.' Then they begin to spell out the words-if that is the method adopted. If E be the first letter, then two wires are teuched, which will cause two needles at the other end to point to that letter, on the lozenge, and so for all other letters. In a general practice fewer letters are necessary than those of the alphabet.

The manner in which these telegraphs are constructed in England is this: the wires, of which there are five or six, are placed in glass tubes and buried several inches in the ground beside the rails. One is now nearly finished from London to Liverpool, and by it messiges are transmitted with astonishing rapidity. For commercial pusposes these telegraphs are of especial importance.

Pennsylvania Canaly-Reduction of Tolls and Freight.

We find in the Harrisburg Intelligencer the following annunciation of a contemplated reduction the rates of tolls and freights to be charged on the Pennsylvania works --

Proposed Reduction of Toll and Freight on our Public Works - There are at present in Harrisburg, a delegation from the board of Trade at Pittsburg, and we believe also from Philadelphia, also a rember of forwarding mon from the cities, and representatives of the transportation companies upon the canals and milrouds. The object is to effect a reduction of both tolls and freight upon the College, at Gettysburg.

Permsylvania public works. We understand that these geatlemen have had several conferences with the canal commissioners and that a reduction will take place which will enable our public works to compete with those of New York, so that we may expect next year, an increase of business and a consequent increase of

The cand commissioners have agreed to reduce the tolis, only on the condition that there shall be a corresponding reduction of freight. This has been accorded to, the reduction to commence on the first day of May next, and that after that day a regular standard of reduced freight is to be maintained throughout the year. This we deem highly sisting entirely of mountain, forest and defile. With important, as uncertainty in price, above a fair the exception of two thousand who escaped to standard, is sure to drive the western merchants

We understand that both toll and freight will be reduced one-third of its present price. That to attend at that time, will be waited upon by the Sour will be carried through for \$1 per barrel, and that the reduction will be so great that bituminous coal will be carried from Pittaburg to Philadelphia.

fativors Boxes.-The New York Tribune says,-"Eighty-nine thousand dollars of 'llimois Sixes, hypothecated with the Mechanics' Banking Institution, by Mesers. Macalester & Stebbins Were sold yesterday at auction-\$39,000 brought 174; \$20,000 brought 17, and \$30,000 brought 15 At the Board, at 'the same time, Bonds were seting at 20 a 204. This sole is stated to have been conducted with great haite, without sufficient notice being given, and Mesars. Macalester & Steb. bins have hid and injunction on the proceedings."

PURITY THE BLOOD .- As the Blood, in its life. preserving course is subject to continued waste. nature has provided for the supply of the exhausting fountain, by the conversion of our food into new blood. But whilst such umple means are provided for the manufacture of new blood, nature has been no less solicitous in providing for the expulsion of that which, is useless and decayed. This important office is performed by the bowels, and when Nature (who is always struggling to throw off offentling matter,) requires assistance in her benevolent intention.

Brandreth's Vegetable Universal Pills will be found singularly adapted to the purpose, because they remove through the stomuch word bowels will corrupt humars from the body, in an easy, safe and effectual manner, producing no effect but what will fimily conduce to the perfect purification of the Blood, and thereby cure the disease, (by whitever name it may be called,) and give perfect health to the whole evetem.

Tr Purchase in Sunbury, of H. B. Masser, and of the agents published in another part of this paper,

MAKRTED.

ockport, on the 7th November that, by the Rev. Mr. Porter, Mr. CHARLES GASS, of Linckport, Ill nois, formerly of Suntury, to Mess MARY A. Manuels, of Norwalk, Conn.

Pies Cared. By the use of Dr. Harlich's Compound Strength-

ening and German Aperient Pills. a. HARLTON, - Dear Sir :- Shortly after I received the Agency from you for the sale of medicine, I formed an acquaintance with a your medicine, I formed an account afficted with lady of this place, who was severely afficted with the Piers. For eight or ten years this lady was subject to frequent painful attacks, and her physician considered her case so complicated, that he very seldom prescribed medicine for her. Through my persuasion, she commenced using your Pills, and was perfectly cured. Yours, &c.

. JAMES R. KIRBY. Chambersburg, Pa. Office and General Depot, No 19 North Eighth HENRY YOXTHEIMER, Street. Jan. 29th, 1842.

COOKING SPOVE, and a few Coal Stoves A for sale, cheap, by Jan 1, 1840.

AT PUBLIC SALE.

ARM, GRIST AND SAW MILLS. ILL be exposed to public sale, on the 7th of Feb. 1841, at 12 o'clock, on the Premises, the very valuable Property briefly described as follows, having been part of the Jenkins Estate, viz: 215 acres, 76 perches, with sllewance, of which about 100 acres are in cultivation, with a large Apple Orchard; the residue Woodland, including imestone Land, and targe veins of Iron Ore. The premises are situated in East Buffalo township, Union county. Pa., on the west side of the West Branch of Susquehanna, about five miles from Northumber and, and three from Lewisburg. adjoining lands of Miss Jenkins, and Messrs. Snook

& Penov. There are two never failing water powers formed by Turtle Creek, which intersects the tract, at one of which there is a Clover Seed Mill on Burrall's patent, and a Milters House, and at the other a Merchant Flooring Grist Mill of stone with over-hot wheels and three run of stones, and a Saw Mill. A good brick and frame Dwelling House, with a Millers House convenient, and a large log Bank Barn are also erected. The tract is well watered by springs and streams, and eligibly situated in a populous neighborhood.

The Iron Ore of Montour's Ridge, extending into the premises, appears to be in great abundance, upon the river bank, where it is laid open, and is believed to pervade the continuous ridge scross the Property. From an adjacent tract, the Shamokin Iron Company now procure the from Ore for their Fernace, and both tracts afford commodious and fire navigation, promoted by the slack-water of the Shamokin Dam, to the Rail Road at Sunbury. which leads to the Shamokin Cost Mines and Iron

Purchasers are invited to view the premises carefully, and upon inquiry they will find the title free from all doubt and difficulty.

The terms of payment are .-- when the Property is struck off \$500, and as soon as the deed is tendered, which will be within five days, the further sum of \$1700. Of the res due, \$5,000 may remain unpaid for three years, and the rest in equal yearly instalments of \$1,000 a year, from the time of sale. All not paid at the delivery of the dead, to be secured by bond and mortgage, bearing intercet. Further inquiries may be made of
