Penicillings of Politicians.

On the same bench with Sir Robert Peel is an old gentleman, whose extreme slovenliness in dress affords a striking contrast to the personal appearance of the prim Premier.

I'm thinking on thy smile, Mary— Thy bright and trusting smile— In the morning of thy youth and love, Ere sorrow came—or guile—

I see full many a smile, Mary, On young lips beaming bright; And many an eye of light and love Is flashing in my sight—

My words were harsh to thee, Mary, For the wine cup made me wild; And I chid thee when thine eyes were sad, And I cursed thee when they smiled—

Thou'rt resting in the church-yard now, And no stone is at the head; But the sexton knows a drunkard's wife Sleeps in that lowly bed—

Thou art slumbering in the peaceful grave, And thy sleep is dreamless now, But the seal of an unyielding grief Is on thy mounger's brow,

Has Had the Measles.—A kind hearted woman took her little orphan niece to school the other morning, and the teacher, affectionately sympathizing with the bereaved condition of her pretty pupil, said to the aunt—

delivered, and having carefully committed it to memory he forwarded the manuscript to the office of the Morning, for publication in the next day's journal, with the other speeches of the expected debate.

When I was staying at Shonchlan's Hotel, Waterford, some years since, I had the pleasure of spending an evening with Mr. Shiel, who was quartered at the same house.

Do you see that little man who has just risen, near the table? What an enormous head he has, for so small a body.

Shiel's voice is harsh, grating, and disagreeable—at times, shrill, almost as a whistle—and occasionally, in the lower tones, cracked and dissonant.

Thou art slumbering in the peaceful grave, And thy sleep is dreamless now, But the seal of an unyielding grief Is on thy mounger's brow,

Just now said that Shiel always wrote his speeches. It is, also, well known, that he is in the habit of himself furnishing the manuscripts to a certain journal, for publication.

In a cavern, on the right bank of the Colorado, about 7 miles from Austria, there is an immense hive of wild bees, which is one of the most interesting natural curiosities in that section.

To FARMERS.—At the end of August, 1843, I planted in my garden thirty-two grains of wheat, at six inches distance, an inch and a half deep; the seed was of first rate quality.

I do not mean to state that such a result would obtain upon a large scale; but I think it is worthy of a trial, when we know that the average produce is only 2 1/2 quarters per acre.

A Charcoal Road.

The process of making such a road is described by a writer in the Cleveland Herald as follows:—

Timber, from six to eight inches through, is cut twenty-four feet long, and piled up lengthwise in the centre of the road about five feet high, being nine feet wide at the bottom and two at the top, and then covered with straw and earth in the manner of coalpits.

A road of this kind is now being made in the cotton Wood swamp near Ellersfield, in Michigan. From the writer above quoted we learn that about seventy rods are completed.

Cravats.

A correspondent of the New Haven Herald writes thus sensibly on this interesting theme: "High, tight white cravats, such as are worn by clergymen, are said to have some agency in producing bronchitis, which is so common to gentlemen of that profession.

RUSSIA AND ITS RAILWAYS.—A letter from St. Petersburg, states that one reason of the haste of the Czar for the completion of his great railway for connecting the two capitals of his empire, is to celebrate the seventh century of the existence of the city of Moscow.

POPULATION.—A newly married couple went to housekeeping, at Boston, in Poplar street. At breakfast, the next morning after their entrance, the gentleman said to his lady:—"My dear, this is Poplar street, and by putting a (you) in it, becomes popular."
