OUR TERRITORY ON THE PACIFIC.

The adjustment of our boundary line in Oregon and the final settlement of all controversy with England on that subject will no doubt give an impetus to emigration to the Pacific coast sufficient to form the population of a new State in that quarter within a few years. If California shall become ours, of which there appears to be every probability, a range of Pacific States will soon exist .- Then will the grand cycle be completed; and civilization in its progress from the East will have reached its ultimate point. From the shores of Oregon our prop'e, the latest born of the nations yet the oldest in the world's history, will look across the Pacific to the land where Humanity was

Ages and ages ago from the banks of the Ganges the first step in the march of civilzation was made. Babylon and Nineva next had their days of greatness; then Egypt, whose victorious Sesostris triumphed as she marched over to the remotest confines of India. Afterwards came the Persian ascendancy; then the splendours of Grecian civilization and the empire of Alexander the Great; and lastly, as the crowning chapter of aucient history, Western Europe swayed the world by the iron grasp of Rome's military legions.

From India Egypt received her philosophy and literature ; from Egypt letters were carried by Capmus into Greece; and into both of the venerable seats of early civilization Pythagoras travelled to bring home truths of wisdom. All these, inherited by Rome, became the property of the European mind. Thus from age to age, from nation to nation, the progress has gone on, every age and every nation, which has received the transmitted heritage of the great trust of Humanity, having had its perticular function, some to develope one characteristic, Exchange Bank* some to bring forth another. And how great the changes have been since the first step of the onward inovement one may distantly conceive by beholding the republican pioneer of America confronting the Brahmin of India-the one the latest type of individual self-dependance and distinct personality; the other the representstive of a priestly dynasty which locked all human freedom in the rigid forms of castes over which superstition ast predominant—a dynasty which existed before History began, and whose representatives at this day are connected by an uninterupted succession with the earliest period of recorded time.

We have reached the Pacific, and there on its tranquil shores the onward pregress of our restless population must stop. Looking over the immense region which Providence has given to us to occupy, the mind is lost in the immensity of the greatness which awaits us, and the heart is stricken with awe at the vast responsibility which must rest upon us as the people who are to hold in trust the accumulated results of all preceding civilization. Human rights and human treedom; self government; the history of fallen nations once great and pow-erful; the records of wars and convulsions which were the parturient throes ushering some new idea or principal into life; all these and a thousand kindred reflections rush into the mind when one ventures to consider the mighty future which lies before this Republic and its adventurous people. - The commerce of the world is to be ours, and both oceans are to be subject to us. The splendours of Eastern cities which grew into greatness by the trade between the Valley of the Nile and the Valley of the Ganges, will shine but dimly, even in the enhanced illumination of fancy and tradition, when compared with the stately magnificence and colossal structure of the cities which are to concen-trate the rich elements of the Valley of the Mississippi. The ruins of Thebes and Memphis, of Palmyra and Balbec remain still to attest a wonderful degree of former greatness; but they grew up by means of a caravan trade on camels, or by a commerce of galleys on the Red Sea and the Persian Gulf. From such a traffic let the eve turn to the rivers canals and rail roads of this continent of ours, to the mighty agency of steam, propelling innumerable ves-sels and cars, and to the immense expanse of alluvial soil, fertile in products under the cul-ture of a people who for enterprise, energy and invention have no superiors- we may say no

The possession of the Pacific coast will give a new impulse to our already rapid progress. A new basis of commercial operations, having the Bay of St. Francisco and the mouth of the Columbia for its prominent points must soon exist beyond the Rocky Mountains. Commercially, says Mr. Senator Banton, the advantages of Oregon will be great-far grater than any equal portion of the Atlantic States. The enstern Asiatics, who will be their chief customers in western Europe-more profitable to trade with, and less dangerous to quarrel with. Their articles of commerce are richer than those of Europe; they want what Oregon will have to spare, bread and provisions, and have no systeins of policy to prevent them from purchasing these necessaries of life from those who can supply them. The sea which washes their shores is every way a better sea than the Atlantic; richer in its whale and other fisheries; in the fur regions which inclose it to the north; more fortunate in the tranquility of its character, in its freedom from storms, gulf streams, and icebergs; in its perfect adaptation to steam navigation; in its intermediate or half-way islands, and its myriad of rich islands on its further side; in its treedom from maritime powers on its coasts, except the American, which is to grow up at the mouth of the Columbia. As a people to trade with ; as a sea to navigate ; the Mongolian race of eastern Asia, and the North Pacific ocean, are far preferable to the Europeans and the Atlantic.

From the Pacific across the Rocky Mounfains to the navigable waters of the Mississippi there are means of communication which may be easily improved into throughfares. The navigation of the Columbia, it is believed, can be made practicable to the upper Falls, a distance of six hundred miles from tide water. The North Pass is declared by Mr. Benton to be as easy as the South-there is no sensible elevation to remind the traveller that he is ascending. From this Pass to the Great Falls of the Missouri is about sixty miles; and the whole distance from the navigable waters of the Cotwo hundred and ten miles only. This interval is well adapted for the construction of a rail

Manufacture and keep constantly on hand, a large assortment of their Patent Im-PROOF SAFES, which are Eso constructed as to set at rest all manner of doubt as to their being strictly fire proof, and

that they will resist the fire of any building in the world. The outside case of the Safes are made of boiler iron, the inside case of soapstone, and between the outer case and inner case is a space of some 3 inches thick, and is filled in with indestructible material, so as to make it an impossibility to ever burn any of the contents inside of this Chest. These Suspetone Salamanders we are prepared and do challenge the world to produce any article in the shape of Book Sales that will stand as much heat, and we hold ourselves ready at all times to have them fairly tested by public bonfire, should a-ny of our competitors feel disposed to try them. We also continue to manufacture and keep constantly on hand, a large and general assertment of our Premium Air-tight Fire Proof Safes, of which we have a large quantity in use, and in every instance they have given entire satisfaction to the purchasers—of which we will refer the public to a

OAKLEY'S DEPURATIVE SYRUP.

THE valuable properties of Oakley's Depura-tive Syrup of Sarsaparilla, as a purifier of the blood, is so well known to the public generally, that it is unnecessary to occupy much space in set-ting forth the advantages to be derived from its use; wherever the medicine has once been intro-duced, it takes precedence over all others: every one that has taken it, have derived so signal beneficial results from it, that it is recommended by them with the utmost confidence. Physicians of the highest standing in the profession, prescribe it to patients under their care; containing nothing deleterious, but being composed of the most mild, yet efficacious vegetable materials, it is offered with confidence, as the chespest and most efficient purifier of the blood now known. The use of a few bottles, especially in the spring months, will be at-tended with a most decided improvement in the general strength of the system, eradicating any seeds of disease that may have been generated, besides giving bealth and vigor to the body.—For the cure of Scrofuls or Kings Evil, Rheumstism, Tetter, Pimples or eruptions of the Skin, White Swelling, Festula, Chronic Cough Asthma, &c. The aumerous certificates in the possession of the subscriber and his agents, from physicians and others, are sufficient to convince the most ekeptical of its superiority over all preparations of Barnaparilla.

Reading, March 14, 1843. MR. OAKERY :- I believe it the uty of every one to do whatever in their power lies, for the benefit of their fellow man, and having had positive proof in my own family, of the wonderful properties of your Depurative Syrup of Sarssparille, I most conscientiously recommend it to the afflicted. We had the misfortune to lose two of our children, by the breaking out of ulcerous sores that covered the face, head and neck, although we had some of the most scientific physicians to attend them and had tried all the known remedies, including Swaim's Panacra, without avail. Another of my shildren was attacked in the same manner, her face and neck was completely covered; the discharge was so offensive, and the disease at such a height, that we despaired of her life. Seeing the wonderful effects of your Depurative Syrup of Sarasparilla, we were induced to make trial of it, as the last resort; it acted like a charm; the ulcers commenced healing immediately, a few bottles entirely restored her to her health, which she has enjoyed uninterruptedly ever since. As a purifier of the blood, I verily be-

lieve it has not its equal, JOHN MOYER, Tailor, Walnut street, near Fourth, Reading.

Douglassville, April 19th, 1843. Mn. OARLEY: -- My son Edmund Leaf, had the scrofula in the most dreadful and distressing manper for three years, during which time he was de-prived of the use of his limbs, his head and neck were covered with ulcers. We tried all the different remedies, but to no effect, until recommended by Dr. Johnson of Nonistown, and also Dr. Isaac Hirster, of Reading, to use your Depurative Syrup of Sarasparille, of which I obtained several bottles, the use of which drove the disease entirely out of his system, the sore healed up, and the child was restored to perfect health, which he has enjoyed uninterruptedly ever since, to the astonishment o many persons who seen him during his affliction. I have thought it my duty, and send you this certificate that others who have a fike affliction in the family may know where to obtain so valuable a Yours truly.

ROSE OINTMENT

RINGWORMS, PIMPLES ON THE PACE, AND OTHER

The following certificate describes one of the care carriers one of the care extraordinary ours ever effected by any application. PHILADELPHIA, February 10, 1838.

FOR twenty years I was severely afflicted with TETTER on the Face and Head: the disease commenced when I was seventeen years old, and continued until the Fall of 1836, varying in vioence, but without ever disappearing. During most of the time, great part of my face was covered with the eruption, frequently attended with violent itch-ing; my head swelled at times until it felt as if it would burst-the swelling was so great, that I could scarcely get my bat on. During the long period that I was afflicted with the disease, I used a great many applications, (among them several celebrated preparations) as well as taking inward remedies, including a number of bottles of Swaim's Panacca, Extract of Saranpavilla, des. In fact, it would be impossible as enumerate all the medicines I used. I was also under the care of two of the most dis-tinguished physicism of this city, but without re-ceiving much benefit, and I despaired of ever being cured. In the fall of 1886, the disease at the time being very violent, I commenced using the Rose Ointment, (prepared by Yaughan & Davis.) In a few applications the violent itching consed, the swelling absted, the eruption began to disappear, and before I had used a jer the disease was entirely cured. It has now been nearly a year and a had since, and there is not a vestige of the disease re maining, except the scars from the deep pits forme by the disease. It is impossible for me to describ in a certificate the severity of the disease and my suffering, but I will be pleased to give a fuller ac count to any person wanting further satisfaction who will call on me. At the time I commence using the Rose Ointment I would have given hun dreds of dollars to be rid of the disease. Since u sing it, I have recommended it to several persons (among them my mother, who had the disease bac ly on her arm.) who were all cured by it.

Rose Ointment, for Tetter. PHILADELPHIA, May 27th, 1839.

HIS is to certify that I was severely afflicit with Tetter in the hands and feet for upwan forty years; the disease was attended general with violent itching and swelling. I opplied to number of physicians, and used a great many app cations without effecting a cure. About a ye since, I applied the Rose Ointment, which entire stopped the itching, and a few applications immed ately cured the disease, which there has been return of, although I had never been rid of it any time for forty years. MEDICAL APPROBATION

Of the ROSE OINTMENT, for Tetter A LTHOUGH the superiority of the preparati over all others is fully established, the prope tors take pleasure in laying before the public t following certificate from a respectable physicia graduate of the University of Pennsylvania. Baugh, having found in this remedy that relief a tedious and disagreeable affection which the men within the range of his profession failed to affe has not hesitated to give it his approbation, althou the prejudices and interests of that profession opposed to secret Remedies.

PHILADELPHIA, Sept. 19, 1826 I was recently troubled with a tedious herps eruption, which covered nearly one side of my fa tor of the Rose Ointment, observing my face, in ted on my trying his preparation, of which he h ded me a jar. Although in common with the m bers of my profession, I discountenance and dis prove of the numerous nostrums palmed upon public'by ignorant pretenders, I feel in justice bo to except the Rose Ointment from that class of dicines, and to give it my approbation, as it ent ly cured the eruption, although it had resisted usual applications.
