The Song of Steam.

BY G. W. CUTTER.

How I languished as I lay concealed from sight

Harness me down with your iron bands,

At the childish boast of human might,

And the pride of human power!

When I saw an army upon the land,

Or waiting the wayward breeze;

When I marked the peasant faintly reel

With the toil which he daily bore,

As he feebly turned at the tardy wheel,

When I measured the panting courser's speed,

I could not but think how the world would feel,

When I should be bound to the rushing keel,

And I pushed to my throne with thunder blast,

Creeping along a snail-like band,

Or tugged at the weary oar:

The flight of the carrier dove,

Or the lines of impatient love;

As these were outstripped afar,

Hat hat but they found me at last;

They invited me forth at length;-

And laughed in my iron strength!

On the earth and ocean wide,

Where now my fiery armies range,

Hurrah! burrah! the waters o'er,

The world-the world is mine!

The rivers the sun bath earliest blest,

Or those where his beams decline;

The giant streams of the queenly West,

The mountains steep decline!

Nor wait for wind or tide!

Or the orient floods divine.

The ocean pales where'er I sweep,

To hear my strength rejoice;

And the monsters of the briny deep

I carry the wealth and the lord of earth,

The thought of the god-like mind;

In the darksome depth of a fathemiess mine

The wind lags after my flying forth;

The lightening is left behind

Or the dawn of the glorious day.

I bring earth's glittering jewels up

From the hideons cave below;

With a chrystal gush o'erflow.

In all the shops of trade;

I carry, I spin, I weave;

On every Saturday eve.

And all my doings I put in print

I blow the bellows, I forge the steel

Where my arms of strength are made;

I manage the foresce, the mill, the mint;

I've no muscle to weary, no breast to decay,

No bones to be "laid on the shelf ;"

Be sure of your curb and rein;

As the tempest scores a chain.

While I manage the world by myself.

Graphic Description of a Brilliant Faploit. We have published an account of the during

act of borning the Creole under the guns of the eastle of San Juan d'Utlos. The following graphic description of the brilliant exploit, which first appeared in the Savannah Georgian will be read with deep interest at this time, now ple, the period of service was originally practithat two of the principal actors in it have met having lost his life by the catastrophe to the U. S. brig Somers, and Passed Midshipman Rodger having been captured by the Mexicans whilst reconnoitering the vicinity of Vera Cruz, premagazince.

It appears that the Creole had slipped in during the night of the 18th November, and taken reluge under the walls of San Juan de Ulias. The Somers was the only vessel then blockeding Vera Cruz, and the officers, anticipating ridicule from the English squadron, who saw that the vessel had slipped the blockade, it was determined, desperate as the enterprise was, to destroy her. Accordingly, on the morning of the 20th, Lieut. Jas. S. Parker asked permission for himself and Midshipman Rodger and Hynson to visit the English spadron, which was

The Englishman laughed and promised, not thinking them mad enough for such an attempt, They shoved off, and soon were lost to his sight Nine gallant hearts were they, who left on a desperate enterprise with such slight farewell -they were in a small six oar'd boat-three officers and six good men. It did seem madness-not so much to do the deed, as to escape after the deed was done, from the fire of such and so many batteries-for discovery seemed incvitable, as the brig was moored to the walls of the Castle, and overlooked by the sentries. The Englishman, a gallant fellow, thought them mad as they pulled away. Three hours after, the Quartermaster of the watch called his attention to a strange light at the Uastle.
