Meeting of the Parmers' Club. would in the French Tree Nurseries The hest kind of Dairy Cows-Mr. Colt's mode of preventing the Potato Rot-Cheese manufacture.

On the 27th ult., the New York Club held an adjourned meeting, Judge Van Wick in the chair, and a fair attendance of members.

From the translations from the French read, we learn that M. Hardy, director of the nurse- ok of the Northern Liberties ties of Algerin, etates that the flowering of the commercial Bank of Penn's. Paulocenta in that region is as much retar Permers' and Mechanice Bank" as in Paris. He says he has in the nucle about 500 dwarf binanas, young and of this has not yet seen their fruit. He at the year to drouth. The nurseries will dond young from ninety to one hundre-neal in this trees. The culture of the groductive.

regarded as likely Subject of Dairy Coms. A letter was frequired for milk to sell Patterson, N. r Holderness breed, which tle enys: y to thirty quarts of milk for take the year. But if milk is wanted give fe use of the producer, take the Al-30 which give eight or ten quarts of milk than the cream we are in the habit of

fing in this city. For general purposes, he was inclined to think that the Alderney, this side of the Allegany Mountains, (except on some of our very rich vally lands) is the best kind of stock for the farmer to keep. Next to Office this, the pure North Devons are good for milk, good for beef and the best of all working cattle -but for gentlemen give him the Alderney, for one wants quality rather than quantity. He had tried Short Horns, but found that our Jersey lands will not support them without too much expenditure beyond grass and hay for grain. Or the Alderneys he would guaranty 7 quarts a day of their creamy milk.

In another letter, read at the same meeting, Mr. Colt dissented from Prof. Mapes' off hand opinion of the non nutritive properties of Corncobs-given some time since-and suggested that a regular chemical analysis of the cobshould be made under the auspice of the Institute. Mr. Smith observed, very sensibly, that the chespest way of ascertaining whether the cobs were matritions or not would be by the throwing the | Bank of Gettysburg\* unshelled corn before the animals and let them choose to suit themselves. Mr. Colt farther stated that he escaped the Potato rot last year. when he used no yard manure, by a dressing that proved beneficial-as follows, in parts: 1 of salt, 1 of Plaster of Paris, 2 of charcoal dust, 2 of wood ashes, 2 of slaked limed and 10 of muck that had been dug twelve months.

The crop, although not heavy, was perfectly saved and of fine flavor. He put them into barrels and filled in charcoa! dust, and they are now as fine, dry and mealy as they were in November. Mr. C. resolved to put in the whole of his crop this year with the same mixture. Perhaps the best way is to spread 10 bushels of salt and 30 of slaked lime, broadcast, to the acre, and then apply the wood-ashes to the extent of about 10 bushels, with 50 of dry | Bank of Washington mucked and I bushed of guano well mixed in City Bank the hills or drills. Let any one try this on an Parmers' & Mech'es' Bank acre, and if he does not realize 300 bushels or | Farmers' & Mech'ce' Bank more of sound potatoes, Mr. C. would be greatly mistaken.

Mr. Gabriel Wakeman, from Herkimer county, in this State, then described most voluminously the cheese manufacture in his fegion. He stated among other incidentalities, that swine should never be nearer than 100 feet to the dairy, whereas they are often not more than 15 or 20 fect removed. The cheese and milk are always more or less affected by their pro-

LAWFUL REVENUE .- Many years since a gentleman in Newington, a parish of Weathersfield, Connecticut, who was a very religious and conscientious man married one of the most ill natured and troublesome women he could find in the vicinity. This occasioned universal eurprise wherever he was known, and one of his neighbors ventured to ask him the reasons which had governed his choice. He replied that having had but little trouble in the world, he was fearful of becoming too much attached to the things of time and sense, and thought by experiencing some afflictions, he should become more wenned from the world, and he married such a woman as he thought would accomplish his object. The best part of the storyie, that his wife, hearing the reason why he married her, was much offended, and out of revenge became one of the most pleasant and dutiful wives in the town, declaring that she was not going to be a pack-horse to carry her husband to heaven.
