

Revolutionary Officers
The Cincinnati Advertiser gives the following record as to the closing scenes of life and final resting places of some of that gallant band of officers who figured in our revolutionary struggle:

Gen. Mercer is usually said to have been killed at the battle of Princeton, but really died of an epileptic fit, in that neighborhood, a week after that affair. The popular notion is derived from the fact that he received a blow on the head, from the butt end of a musket, in the hands of a British soldier, in full retreat with his comrades. He was knocked down and stoned for some time—as the consequence. Mercer was buried in Christ Church, Philadelphia.

Putnam was disabled from active service in the very middle of the strife, 1779, by a paralytic stroke, but survived till 1790, being 72 years of age at his death. He was buried at Brooklyn, Conn.

Wayne died at Erie, Pa., where he was buried. At a later date the body was transported to Chester county, Pa. Although nearly a quarter of a century had elapsed, the lineaments of the deceased here were distinctly visible, and the features recognized by persons present; of course, the corpse crumbled to dust on exposure to the atmosphere.

Schuyler, who deserves all the credit of the capture of Burgoyne, of which he was deprived by Gen. Gates assuming the command, just as all the arrangements for the battle had been made at Saratoga, died at New York in 1804.

Steuens, the Chevalier Bayard of our revolution, *sans peur et sans reproche*, after vainly endeavoring to obtain the fulfillment by Congress of their engagements to him, returned to Utica, New York; the legislature of which State voted him a township—six miles square—of land in that neighborhood. Here in a humble log house he died, and was buried adjacent in 1797.

St. Clair's last resting place is at Greensburg, Westmoreland county, Pa. A neat marble pyramid being erected over his remains by his immediate brethren.

Miffin, the idol of Pennsylvania, died in Lancaster, Pa., and was buried there.

Maxwell, who commenced the battle of Brandywine, by opposing Knyphausen's troops, in their attempts to cross Chad's ford, died at Flemington, N. J.

Montgomery and McDougal are buried in New York.

Alexander—Lord Sterling, at Albany.

Parsons, at Marietta, Ohio.

Morgan, at the hero of Couperus, at Winchester, Virginia.

Sullivan, at Exeter, N. H.

Scott, in Kentucky.

Knox, at Thomaston, Maine.

Henry Lee, in Virginia.

Charles Lee, lies at the foot of Gen. Mercer's tomb, in Christ Church, Philadelphia.

BANK NOTE LIST.

PENNSYLVANIA.

The following list shows the current value of all Pennsylvania Bank Notes. The most implicit reliance may be placed upon it, as it is every week carefully compared with and corrected from Bicknell's Reporter.

Refer to Messrs. Wm. Wilson & Sons, Isaac Reynolds & Son, Davidson & Saunders, Reynolds & Smith, and Messrs. Tingley, Caldwell & English, Phila. May 15th, 1847.—2a

SOMETHING NEW!

THE Subscriber has the exclusive right of vending J. M. THATCHER'S Hot Blast Hot Air Cooking STOVE.

in the counties of Northumberland, Columbia and Schuylkill; and from the encouragement met with already, they expect to do a large business. This stove is constructed on an entirely new principle, and on the only principle that can make both a good wood and coal stove. The inventor has overcome all the difficulties that so frequently belong to other stoves. He has by his arrangement, constructed a broiling Oven in front, where in broiling, roasting, frying or baking may be done, and all the small that arises therefrom must pass into the combustible chamber, and is not at all thrown out into the room. Besides this, there is an oven only two inches less than the whole size of the stove, wherein baking or roasting may be done as well as it can be in the common brick oven. This oven is always fit for use when the stove is heated, as the whole draught of hot air passes around it constantly.

Public attention is particularly called to this stove. It can be seen at our Store and Tin Establishment in North Danville, at the sign of the Columbia Tin shop, and at the Foundry of Rohrbach & Clement in Sunbury, where its particular qualities will be fully shown and explained to any person wishing to examine it.

The subscribers continue to have on hand all kinds of parlor stoves, such as radiators, cylinders, fancy and plain, suitable for all who may favor us with a call; also common sheet and Russia Iron, which can be made in any desirable shape; together with a general assortment of tin and japanned ware, whitewash and steel. The inventor has over come all the difficulties that so frequently belong to other stoves. He has by his arrangement, constructed a broiling Oven in front, where in broiling, roasting, frying or baking may be done, and all the small that arises therefrom must pass into the combustible chamber, and is not at all thrown out into the room. Besides this, there is an oven only two inches less than the whole size of the stove, wherein baking or roasting may be done as well as it can be in the common brick oven. Public attention is particularly called to this stove. It can be seen at our Store and Tin Establishment in North Danville, at the sign of the Columbia Tin shop, and at the Foundry of Rohrbach & Clement in Sunbury, where its particular qualities will be fully shown and explained to any person wishing to examine it.

The subscribers continue to have on hand all kinds of parlor stoves, such as radiators, cylinders, fancy and plain, suitable for all who may favor us with a call; also common sheet and Russia Iron, which can be made in any desirable shape; together with a general assortment of tin and japanned ware, whitewash and steel. The inventor has over come all the difficulties that so frequently belong to other stoves. He has by his arrangement, constructed a broiling Oven in front, where in broiling, roasting, frying or baking may be done, and all the small that arises therefrom must pass into the combustible chamber, and is not at all thrown out into the room. Besides this, there is an oven only two inches less than the whole size of the stove, wherein baking or roasting may be done as well as it can be in the common brick oven. This oven is always fit for use when the stove is heated, as the whole draught of hot air passes around it constantly.
