COMPLETE POSSESSION OF THE CITY on the morning of the St. and then retire. The ! Anthentie News at Last !

The news is glorious for the American army, though at the same time our losses are severe, and the details of the killed and wounded are heartsickening.

'Thank God!' says the Picayune, 'none of our Generals have been killed, but Major Gen. Pillow and Brigadier General Shields were both wounded, severely wounded, but were doing well at the last accounts."

On the 8th, Gen. Worth's division lost about All I want is a call to convince custoof the 13th, the storming of Chapultepec and the attack on the citadel, Quitman's division lost 300; Twiggs' 268; Pillow's 142, and Worth's 138-making the loss 818 in all. Worth had scarcely one thousand men in the action.

Our entire loss since leaving Puebla, in kilstreet, above Eleventh, north side, Philaled, wounded and missing, Kendall sets down at full 3000. Another authority makes it 4000, and yet Gen. Scott entered the valley of Mexico with an army of only little exceeding 10,000

> The Mexican accounts, representing that we were at any time seriously repulsed, are not

The Mexican loss is not definitely ascertained but was enormous. Gen. Bravo was not killed, but taken prisoner. We do not see that Santa Anna was wounded. It is true that he has resigned the Presidency; since his resignation he has made an address to his countrymen.

We annex here General Scott's order after his victorious occupation of the City of Mexico. by which it will be seen that General Quitnan, who gloriously distinguished himself on the 13th, is Governor of the city:

GENERAL ORDER, No 184. HEADQUARTERS ARMY, Mexico, Sept. 14, 1847

Under the favor of God, the valor of this ar my after many glorious victories, has hoisted the colors of our country in the capital of Mexico, and on the palace of their government-but

the war is not yet ended.

The Mexican army and government have fled only to watch an opportunity to return upon us in vengeance. We must then be upon our guard. Companies and regiments will be kept together, and all stand on the alert. Let there be no drunkenness-no disorder-and no straggling. Stragglers will be in great danger o assassination, and maranders shall be punished by court martial.

All of these rules, so honorably observed by

The honor of the army and the honor of our country call for the best behavior on the part of the valiant, thus to win the approbation of all the good of their country. Be sober and merci-His noble brethern in arms will not be deat to this hearty appeal from their commander and friend. GENERAL SCOTT.

Major General Quitman is appointed civil and military Governor of Mexico, by command of Maj. General Scott. Two days after he issued the following additional order:

GENERAL ORDER, No. 186.

HEADQUARTERS ARMY, National Palace, / Mexico, September 15th, 1847.

The General-in-Chief calls upon his brethren in arms to return, both in public and private worship, thanks and gratifude to God for the glorious and signal triumphs which they have recently achieved for their country, beginning with the 10th of August, and ending on the 14th of September. This army has gallantly fought its way thro'

the fields and forts of Contrerss, San Antonio, Cherubusco, Molino del Rey, Chapultepec, and the gates of San Gosler and Tacubaya, into the capital of Mexico. When the very limited number who had performed those brilliant deeds shall have become known, the world will be astonished, and our countrymen filled with joy

and admiration.

But all is not done. The enemy, though stattered and dismayed, has still many tragments of his late army hovering about us, and aided by an exasperated population, he may again rounite in treble our number, and fall upon us to their advantage, if we rest inactive on the security of past victories. Compactness, vicilance and dicroline are therefore our only secu-

Let every good officer and man stoutly regard these cautions, and enjoin them upon all others. By command of Mai, General Scott. H. L. Scott, A. A. A. G.

buildings, which the Mexicans call Casa Mata, is situated on the west side of Chapultepec, and within six pound range of the guns of the fort. On the west side of the buildings, and the breastworks around them, is a large open plain, gradnally descending to the position occupied by the Mexicans-a deep ravine inclines round this plain, or open space, until it arrives within about two hundred yards of the building upon which rested the enemy's right flank-two 24 pounders, belonging to Capt. Huger's seige train, were placed in position to batter down the breastworks and buildings, if they were found to be occupied by heavy force-but they did not fire but a very few shuts, before Gen. Worth advanced his infantry down the plain, and attacked the rnemy's works in the front and centre. The Mexicans opened upon their a most murderous fire from the point attacked, and both their flanks, which moved down our troops like

grass before the scythe. Many of the best offi cers of the division were cut down, and the heavy loss in the ranks caused the advance to waver for a moment, until the supporting force came up, which also sustained a severe loss,-A column of lancers, numbering 4000 to 5000 which were stationed on the enemy's right, perceiving the effect of this deadly fire on our infantry, came charging down, in the hope of being able to take advantage of circumstances, and put our troops to rout-but they were soon checked in their onward career. Col. Duncan brought two pieces of his battery to bear upon them, and Capt. Drum, with the two recaptupon them-while at the same moment, Ma; Sumper, with two squadrons of dragoons, and Capt. Raff's company of mounted rifles, which, cards. While the cavalry and the infantry, rallying, succeeded in carrying the buildings and bresstworks which the enemy held, and been set for him, compelled them to retreat-capturing 7 pieces

soon as they were driven from the buildings, Capt. Drum and Col. Duncan advanced their opened a most destructive fire upon them, as they retreated across a low plain to the rear of the position they at first occupied. Our loss was very heavy, and I regret to say, that some of the very best officers of our army tell killed and wounded, while the Mexican loss was very slight, until they commenced their retreat -While the cavalry were passing in front of the enemy, in order to charge the column of lancers, they were not under the fire more than ten seconds, and during that time they sustained a loss of 6 officers wounded, 33 privates killed and wounded, and a loss of 105 horses .--There were but two officers that did not have their horses shot under them-but there is one thing very remarkable, that the horses from which the riders had been shot, wheeled and moved with the same regularity as though they had been mounted, until they came to hait from the charge, when they all kept on in a body in

direction of the enemy. We were deceived in reference to the chararter of the buildings, as there was no foundry, or even a semblance of one-and after blowing up some of the buildings, and bringing off our killed and wounded, we evacuated the place, as the occupation of it would give us no advantage. Our loss was 800 killed, wounded and

The result of this engagement taught us one lesson, which was, that the Mexicans use their arms well, and fight well, when they are in position; and although the superiority of our arms, and the valor of the troops will eventually triumph, yet still we must call into requisition all our military science and skill, or we purchase succinet and graphic acount of events from the purvictories at ton dear a price. A list of the killed and wounded, you will find in the general recapitulation which I send you. Many a tear will be shed on its perusal, and many a heart will bleed for the noble souls, and the old and firm veterans which fell in the assault.

In the course of the night three heavy batteres were planted in front of the Castle of Chapiltepec; No. 1 commanded by Capt.
