Importers & Wholesale Dealers in in the counties of Northumberland, Columbis ATCHES. Watch Gla ses and Materials. Schuylkill; and from the encourage and met Jewelry of all descriptions, qualities and already, they expect to do a stove is constructed on an entirely new price and on the only principle that cin make bo good wood and coal stove. The inventor has c come all the difficulties that so frequently belor other stoves. He has by his arrangement, structed a broiling Oven in front, w in broiling, roasting, frying or baking may be and all the smell that arises therefrom must into the combustible chamber, and is not a thrown out into the room \_D Besides this, t is an oven only two inches less than the whole of the stove, wherein baking or roasting ma done as well as it can be in the common brick o This oven is always fit for use when the stor heated, as the whole draught of hot air passe

tic shape without the slightest change by contracting or warping."

yielding as melted wax or putty, and may be

moulded into any form or stretched out thinner

than the finest paper. When it cools it be-

comes hard and tough again, and retains its plas-

The preparation is said to be already known in Eugland, where it has been employed in book-binding, for which purpose it has been preferred to leather. Ornaments as elegant as those of papier mache are made of it, and it is said to have been made use of also for mould ings and cornices. Acids and chemical agencies have no effect upon it, while its tenacity in resisting weight is so wonderful that a slip will sustain a weight of fifty pounds. A leaf of this remarkable Gutta Percha no thicker than bank note paper is as impervious to water as glass; for umbrellas, overcoats, roofs of houses, bottoms of ships, coverings of boxes, and in all cases where protection from wet is desired, its use will be invaluable. It can be formed into gas pipes and water pipes of any size, and any degree of strength that may be required ; and used for such purpose will never decompose or wear out; and being dustile and elastic it may be applied in a thousand shapes, and for thousands of purposes, where iron or lead cannot now be used.

For floor cloths, it is said that it will super -ede the use of all other materials, as it can be made of extreme thinness, perfectly impervious to sir or water, and of greater durability than any other flexible material known. In its hard state it can with difficulty be cut with a knife or a saw, but when it is soft, it can be moulded into the most delicate forms by the hand of a child.

So much for this wonderful novelty in manufactures. Too many persons must not speak at oace for its monopoly !

IRON IN ENGLAND .- There seems to be just ground for fears of disaster to our iron interest. The Pittsburg Gazette learns, on high authority. that commission houses in Buffalo have received via New York, iron with orders to sell at almost any price. Every ton of iron that goes to Buffalo via New York, says the Gazette, is so much taken from the amount that Pennsylvania should sell. The Kutaning (Pa.) Free Press. says that offers have been made by English agents, to deliver in the city of Pittsburg, during the present year, not less than ten thousand tons of Scotch pigs, at less than \$25. This iron is sought after, in England, as ballast for shipping.

"Why am I like Texas ?' said the unmarried Miss Star to a bashful wooer, who did not 'spunk up.' as the saying is. 'I don't know,' said the verdant one. 'Because I am a lone star.' 'Then,' said Gideon, brightening up, 'let me propose annexation."

failed move the cause of the disease, consequently it cannot exist any longer, after sufficient perseverance closed failed in its use has deprived the blood and body of all acrimonious humors and incrustation. closed nosale

DISEASES OF THE LUNGS-CONSUMPTION.

This is a very prevalent and fatal disease ; it results mostly from neglected coughs, colds and bronchitis, also from im soper treatment in many of er failed cases, such as measles, fevers, inflammations and small pox, and a host of other badly treated diseases; where the cause, instead of having been thoroughly removed from the blood and body, have only been par palliated or removed from one pot to break out in another. By divesting your bodies of all foul hupar more, through the medium of Dr. SWEETSER'S PANACEA, the cure is at once rendered certain and permanent. R collect, while there is acrimfailed nious humors fl ating in the circulation, it is as upt failed to settle on the lungs as any other part of the body ; failed this is the reason that consumption is so prevalent.

BILES, SORES AND ULCERS. Which you see on the exterior, come from and failed have their source in, the interior, and might just as well have settled on your lungs, liver, or any other part; which we know they frequently do, and pro duce most violent inflammatory disorders. The no sale humor which occasions these sores is of a highly scrimonione burning nature. We know it from the pain it gives in forming, and afterwards its rapidly ulcerating and corr ding the flesh and skin of the part where it breaks out. This shows the necessity of frequently purifying the blood with Dr. SWEETSER'S PANACEA, and keeping such failed malignant humors in surjection. Should you have a bile or ulcer, be thankful that nature has taken par trouble to warn you of the danger your life and bo dy is in, for it is a watning that the blood is foul, Had this same acrimony a-lected the lungs in-tead of the surface of your body for its seat, consump-tion of the lungs would have been the consequence. D lay not then, to purify and cleanse with Dr. Sweeters's Panaces. -

SPINE DISEASE Spinal affections, enlargement of the bones and joints, white swellings, hip joint complaint, rup-tures, falling of the bowels and wom's disease, will find a speedy oure in Dr. SWEET-ER'S PA-NACEA. Where the disease has been of long standing, the time required to make a cure will be

longer; but the patient may rest assured that a determined perseverance will effect it. par par par BRONCHITIS, ASTHMA AND DISEASE OF

THE WINDPIPE. These diseases proceed from the seriosity or prupt humore of the blood, having settled itself on the threat and lungs, and stopped them up, so that they cannot draw sufficient air in for respiration. Dr. SWEETSER'S PANACEA will give imme-

diste relief, and to make the cure perfect and cor-

acrimonious humors irritating the nerves; the nerves receive the morbid impression from the stomach, or rother from the blood through the agency of the stomach and dige tive organs, and although other parts of the body are apparently the seat of the disease, still it is caused by the morbid impressi in conveyed from the blood by the nerves, to that part. A few doses of Dr. SWEETSER'S PA-NACEA will soon assure the patient that he has the cure in his possession.

ERYSIPELAS, on ST. ANTHONY'S FIRE This is an inflammatory disorder, alw ys at end ed with more or less pain. It proceeds from the foul, acrimonious humors lodged in the blood and fluids, settling on the limits and face, causing extreme pain and fevers ; all applications on the surface are worse than useless, as they only tend to throw the disease in some other part, and perhaps cause death. Bleeding is likewise improper. cure the di-case you mu-t get rid of the cause ; only manage to get the foul humors out of your blood. sud you will be well in a day. Dr. SWEET. SER'S PANACEA, a thorough purifier of the blood, will search out every impurity in the more remote parts of the body and expel it through the medium of the bowels. There is not a vein, artery, muscle or organ of the entire framework of man, that Dr. Sweetser's Panaces does not improve. To take it when you are well is to keep well ; and when sick to become well.

DR. SWEETSER'S PANACEA, being composed only of a vegetable matter, or medical nerbs, and warranted, on oath, as containing not one particle of mercurial, mineral, or chimical substances, is found to be perfectly harmless to the most tender age, or the weakest frame, under any stage of human suffering ; the most pleasant and benign in its operation that was ever off red to the world ; and at the same time the most certain in searching out the root of any complaint, however deep, and of performing a core.

Price \$1 per bottle, or six bottles for \$5. For sale, wholesale and retail, at the corner of CHARLES and PRATT Streets. Baltimore, and GEORGE BRIGHT. also by Nov. 6 1847 .- iv Sunbury.
