RETHE ONLY INSTRUMENTS constructed on A a truly scientific principle. They have greater strength, and will remain longer in Tuse than any other Piano. The construction is simple and n to al, ali the extraneous lumber in the body of the instrument is dispensed with the sound boards are merely two-arched planks of thin wood, like the front and back of a violin; the strings are attached to a strong from frame, which is separated and entirely independ at of the case, thereby dispensing with the old harp form of stringing, by substituting straight bridges, preserving at the same time the Over Strang Bass, of which Mr. Darque is the Inventor. By these improvements we gain much more vibratory power, at the same time preserving all its purity and rickness of tone. They have received the highe-trestimonials from the Press, and all the principal artists in the country. among which are; L. M. Gottschalk,

Mr. SEGESMUND THALBERG, the great pianist, says :- I have examined your new Piano fortes, and I cordially approve of its system of construction. Its principle by which great increase of vibratory power is obtained, being very simple and perfectly philosophical. The tone is grand and noble; it has great capacity for sustaining the sound or singing, and its volime of tone or power I have never heard excelled in depth, purity, and sympathetic sweetness.
WM HENRY FRY, late musical critic of the N. V. hibane says:- I have examined your newly invented liano Fortes, They merit all the praise given to then: by Mussrs. Thalberg, Gottschalk, Mason and others... As regards structure, they are original and philosoph. ical ; in purity, volume, and continuity of tone; in vocal versimilitude, that crowning excellence which enables the planists to "sing" on the instrument. Your Planos ever de-erve the highest rank, Your in vention, in my opinion, is destined to work radical
