PIANO-FORTES. DRIGGS' NEW PATENT.

A RETHE ONLY INSTRUMENTS constructed on a truly scientific principle. They have greater strength, and will remain longer in Texa than any other Piano. The construction is simple and note at, all the extraneous lumber in the body of the instrument is dispensed with; the sound boards are merely two arched planks of thin wood, like the front and back of a violin; the strings are attached to a strong Iron frame which is reparated and entirely independ at of the case, thereby dispensing with the old harp form of stringing, by substituting straight bridges, preserving at the same time the Over strong Bass, of which Mr. Driggs is the Inventor. By these improvements we gain much more vibratory power, at the same time preserving all its purity and rickness of tone. They have received the highest restimosials from the Press, and all the principal artists in the country.

among which are; Harry Sanderson, S.Thalberg, Wm. Mason, Max Maretzek, Pheodore Eisfield, Herman Wollenhaupt. Francis H. Brown, A. Barili. M. Strackosch, Wm Henry Pry, Chas Fradel. Mr. SEGESMUND THALBERG, the great planist says :- I have examined your new Piano-fortes, and I scordially approve of its system of construction. Its ume of tone or power I have never heard excelled in depth, purity, and sympathetic sweetness.

Wm. HENRY PRY, late musical critic of the N. Y. T ibune says. I have examined your newly inventor Piano Fortes. They merit all the praise given to then by Weggrs, Thuberg, Gottechais, Mason and others. As regards structure, they are original and philosoph ical; in purity, volume, and continuity of tone; in voenables the pianists to "sing" on the instrument. It can sing with a smooth delivacy, perfectly unattainable on any other instrument : an ordinary player obtains with no exer-tion, the fullness of a Grand Piano Forte, and they
