The Difference.

The Republicans, says the State Journal, believe in letting slavery stay where it is, and take care of itself. The Democrats believe in agitating for its permanence, and gratifying all its demands for extension. If there is any one thing in our political history clearer than another, it is that slavery has always been aggressive, while freedom has always stood on the defensive. The Democratic party has always joined the slave interest in pushing its claims to new privileges .-This is too familiar a fact to be denied; and it places the responsibility of the eternal discussion of the "negro question" at once and forever on the shoulders where it belongs. The demand that slave labor shall be spread over territories now free asserted by the Democracy, necessitated, in sheer self-defence, the existence and the labor was to hold its own, if our white industrial classes were not to be driven to the wall by the black, then it is plain to

The Republican party is emphatically and truly the party of the white man .-While the Democracy seeks to let slavery fore the Police Court for being a common into all places where it is not, thus degrading white labor, their opponents seek to save every foot of territorial soil for the white man. They do not desire to see the fair domains which open their rich fields to human culture, cursed by the black foot of the slave. They leave to the Democracy the championship of the idea that slavery and freedom have equal rights and are equally indifferent .-They honestly and avowedly prefer freedom; prefer it because they have seen its greater blessings, and proved its superior value. So far as the question of freedom versus slavery enters into the domain of This is effected by means of a steel die, the law, so far as they have constitutional control over its extension or restriction, they do not hesitate to throw their weight in the scale of freedom. Beyond this, they seek not to go. Believing in the benefits of white labor, they strenuously oppose every course of policy which looks to the colonizing of the territories with negro

The Democratic party is never done with the negro. They fetch him forward at every convention, and make him "show his paces" from every stump. They fill their party organs with his claims (or and very properly so, from the fact that rather with the claims of his owner,) and seek to browbeat the country into the belief that he has the right to be carried everywhere. While their opponents are busied with the endeavor to sustain the rights of white men and white labor, the Democratic party have the hypocracy to call them "Black Republicans," and "negrophilists." The Democracy have a family, and possess no interest for the genpermanent "lien" on the negro question. eral public. The negro is the staple of their speeches, the essence of their articles, and almost their whole stock in trade. They use him

"Their grace 'fore meat Their talk at table, and their talk at end."

He is the burden of their most audacious charges, the subject of their most reckless shameful and unscrupulous party warto vilify those whose policy consists in letting him alone, they fling him, like a sucked orange, at their feet, and clamor about "agitation" and "abolitionism!" --Such brazen impudence, properly invested, would make the fortune of any bellfounder in the community.

### Washington Monument.

An effort has been started at Washington for the purpose of raising funds to complete the monument in course of erection there to the father of his country. It consists in an appeal to the people to contribute funds for that purpose thro' the postmasters of their respective towns. About 1,000 postmasters have boxes for the purpose placed in their offices, and have raised within the past four months more than \$2,000. There are nearly 28,000 postmasters who have not been heard from, and it is to be hoped that they will co-operate with the others. If they will consent to do so, and if the returns average only \$1.50 per year, or 124 cents per month, the work can be kept in progress. A very slight effort made in each place throughout the country would iusure the completion of the monument in a few years. Editors of newspapers are desired to call attention to this patriotic enterprise.

CURIOUS STORY -The Chicago Journal of the 13th tells the following extraordinary story :

This morning, a case was examined before Justice Akin, which has an air of romance around it, and exhibits a revelation of real life from which a most thrilling tale of fiction could be wrought. A woman named Ellen Welch was found last night by one of the policeman roving about the street, slightly intoxicated. She was arrested upon the charge of vagrancy. Parties who are knowing to her history inform us that some five or six years ago Ellen ran away from Ireland in company with a dashing young Irishman whom her parents had forbidden her to marry. Her father lived at Castle Kearney, and was a man of opulence and influence, and Ellen had been well brought up. But with that perverseness which is always characteristic of love, was bent on marrying the young officer. She accordingly eloped with him, and came to Philadelphia, where she was marrie 1.

She lived with her husband about a year, at the expiration of which time he died. She then came to Chicago and married again, but again she was doomed to misfortune. Her husband, who had the reputation of being an excellent man, was action of the Republican party. If free drowned in the river by falling from a schooner. Ellen maintained herself by sewing for a time, but finally fell in with disreputable characters, who fleeced her out of her clothing, and an allowance of town. any man who can reason, that resistance thirty dollars which she received every to the extension of slavery was a logical three months from her father through the priest. She took to drinking, and by gradual descents soon fell to a low depth We know from indubitable sources that this woman, this morning arraigned bevagrant, is an own niece, to Daniel O'Connell, the great Irish orator and reformer, her mother Mary O'Connell, being his sister. Her parents, as we said before, occupy Castle Kearney, in Ireland, and are known through the length and breadth of Ireland as a family of opulence, and widely esteemed for their many acts of kindness.

NEW POST OFFICE STAMPS .- A new Post Office Stamp has been invented by a gentleman in Philadelphia, which is calculated to meet a public want that has long been felt. The peculiarity of the new patent stamp is this :- it leaves its impression | the Western Penitentiary. not only on the envelope enclosing a letter, but upon every fold of the letter itself .letters and figures upon which are formed by a series of fine points, which pierce the envelope and its contents in such a manner as to impart, ineffaceably, the name of the post-office and date upon which the letter is mailed. Since the general introduction of envelopes, much inconvenience has been suffered from the want of such an invention.

In numerous instances, as every business man knows, letters containing orders are received, in which the name of the posttown and the date are entirely omitted, and upon which the post-mark has been so imperfectly impressed as to be unintelligible. For this reason post dates on envelopes are not received in court in evidence wrong envelopes could be easily substituted to make out a case. With the new steel pointed stamp, however, all these disadvantages are effectively obviated.

CHAPTER I.

# Introductory.

If is really astonishing how little attention we Pennsylvanians pay to the local history of our Commonwealth. Many an incident o pioneer life, many a scene of savage warfare, and frontier strife, enacted within our borders, that might well occupy the pages of history, are only preserved as legends of an early history, and will soon be lost forever. Indeed, in the present age of railroads and telegraphs, we scarcely think of looking into our past history; devoting all our attention and our energies to the future.

Treego's "Geography of Pennsylvania," and Burrowes' "State Book," are both excellent works in their way, and no school-room should be without the one or the other of them .-Thackaray, according to a rumor affoat | Geographically, they are accurate and reliable ;-but they make little or no prefensions to a history of the early settlement, as this would have been beyond the aim of their respective authors.

The author of "Historical Collections," SHERMAN DAY, of Connecticut, has succeeded in rescuing much that is interesting and "entertaining in our early history" from oblivion. In order to accomplish his purpose, he visited every county in the State, gave wood cuts of the different County seats, from views taken by himself, and elicited every possible information as to the history and resources of every County in the State. He has since been followed by plagiarists, who, in pretence of giving the history of certain Counties, boldly appropriated the whole of his labors, without a word or thought of their own, and succeeded in palming the theft upon the community.

But every County contains a volume in itself; and I, gentle reader, your unknown friend, shall be the chronicler of Cambria County. Intimately acquainted with her geography, her population, and her resources, I trust to be able to do full justice to these departments. But I shall attempt something further than this ;-and endeavor to give : separate history of the settlement of each ted characters, &c., &c.
