A N APERIENT and stemachic prepa-ration of Iron purified of Oxygen and Carbon by combustion in Hydrogen. Sanctioned by the highest medical authorities, both in Europe and the United States, and prescribed in their practice. The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions, indicate its necessity in almost every conceivable case. Innoxious in all maladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections, Emaciation Dyspepsia, Constipation, Dierrhau, Lysentery, Incipient Consumption, Scrofulous Tuberculone, Salt Rheum, Mismenziruation, Whites, Chloresie, Liver Complaints, Chronic Headaches, Rheu matiem, Intermittent Fevers, Pimples on the Face, etc.

In cases of GENERAL DEBILITY, whether the result of acute diseases, or of the continued diminution of nervous and muscular energy from chronic complaints, on trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bedridden as to have become forgotten in their own neighborhoods, have suddenly respicated in the busy world as it just returned from protracted travel in a distant land. Some very signal instances of this hind are attested of female sufferers, emaciated victims of apparent marasmus, sanguincous exhaustion, critcal changes, and that complication of nervous and dyspeptic aversion to air and exercise for

which the physician has no name. In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the old exides, it is vigorously tonic, without being exciting and overheating; and gently, regularly aperient, even in the most obstinute cases of costiveness, without ever being a gastric purgative, or inflicting a disagreable sensation.

It is this latter property, smong others, which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms

In Dyspepsia, innumerable as are its causes. a single box of these Chalybrate Pills has often sufficed for the most habitual cases, including the attendent costiveness.

In unchecked Diorrhao, even when advanced to Dysentery, confirmed, emaciating, and appsrently malignant, the effects have been equally decisive and astonishing, In the local pains, loss of flesh and strength

debilitating cough and remittent hectic which generally indicate Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances. In Scrofulous Tuberculosis this medicated

In Intermittent Fevers it must necessarily be a great remedy and energetic restorative, and ts progress in the new settlements of the West, will probably be one of high renown and usefulness. No remedy has ever been discovered in the whole history of medicine which exerts such prompt, happy and fully restorative effects.
