A BEAUTIFUL REFLECTION.—Bulwer eloquently says: "I cannot believe that earth is man's abiding place. It cannot be that our life is cast up by the ocean of eternity, to float a moment upon its waves and then sink into nothingness. Else why is it, that the glorious aspirations, which leap like angels from the temple of our hearts, are forever wandering about unsatisfied? Why is it that the rainbow and clouds come over us with a beauty that is not of earth, and then pass off and leave us to muse on their faded loveliness. Why is it that the stars, who hold their festival around the midnight throne, are set above the grasp of our limited faculows, stay in our presence forever."

TER .- For some reason not yet known, cream skimmed from milk in cold weather does not come to butter, when churned, so quickly as that from the same cow in warm weather. Perhaps the pelicles, which form the little sacs of butter in the cream, are thicker and tougher. There are two methods of obviating this trouble in a great degree. One is to set the pan of milk on the stove, or in some warm place as soon as strained, and let it remain until quite warm-some say until a bubble or two rises, or until a skim of cream begins to form on the surface. Another mode recommended, is to add a table spoonful of salt to a quart of cream when it is skimmed. A gentleman residing in West Newbury having missed a good many sticks from his woodpile, his suspicions fell upon a wellto-do, but miserly neighbor of his, whom he thought capable of the act. He resolved accordingly, to resort to the old expedient of placing a heavy log in a tempting position, having first well charged it with gunpowder, not only in the centre, but in several minor crevices.

Sure enough; the stick disappeared, and one looking very much like it "might have been seen," as James says, on the suspected gentleman's hearth on the ensuing Sunday. Before it, in a huge tin-kitchen, a turkey was browning itself into a climax. All of a sudden a thundering explosion was heard-the tin-kitchen was blown into a thousand atoms-the dismembered turkey flew through the atmosphere, and the old tom-cat disappeared up the chim-
