The members of the Republican County Committee are requested to meet at the Court House, at Ebensburg, on MONDAY, JUNE 7TH, 1869, at 2 o'clock, p. m., for the purpose of choosing Senatorial Conferees and electing a Representative Delegate to the Republican State Convention...

The Prevention of Crime.

Very few questions are more worthy of discussion than that now occupying the minds of so many thoughtful people relative to the fruitful sources of crime and the means of preventing it. The agitation so far has been confined chiefly to the efficacy of different systems of prison discipline and the influence of education on morals.

As to the means of securing public and private morality, a newspaper article is too short to give opportunity for more than a mere glance at them. Yet it is through the agency of the press that the discussion of the question for the benefit of the people must be carried on.

As to the influence of literary or other education of an intellectual character in the promotion of morality, it comes to this: The properties of man's nature are threefold—physical, intellectual, and moral. We could wish as much propriety, train the moral to develop the physical, or the physical to develop the intellectual...

On what, then, are we to rely for the promotion of morals? asks the reader.—Not on statutes, not on intellect nor intellectual education, but on the training of the young "in the way they should go, and when they are old they will not depart from it," answers the editor.

The Three-Cornered Alliance.

The country was startled one day last week by a cable dispatch from London stating that the initial steps for an alliance, offensive and defensive, between Great Britain, France and Spain against the United States, had been taken.

Though startled at first by the suddenness of the report, no American was frightened by it. Every one knows that England cannot afford to engage in hostilities just at present, for Ireland and the Canadas only wait the fitting moment to cut loose from the "mother country" and strike her full in the face.

Gen. Clay has written that he will remain until Curtin arrives.

The editor of the T. Vindicator was at first a simple doctor. It is now said he is a corn doctor. We hope he will never become a corned doctor. Fact No. 1.—Mister Thompson came to town, ridin' on a pony, bought hisself a printin' shop, and thought it maccarony. Fact No. 2.—Mister Thompson wrote some things, all for the Vindicator. His ears stuck out—he was an ass—He brayed—it was his natur'.

The Postoffice Department has established a through line to the Pacific coast on the new railways, and will save an immense amount of money thereby annually over the stage system. The Alleghanian says a good many of the trout up that way will weigh a pound. Don't doubt it; but how many of them?—Standard. How many trout in a dozen? Mr. Greeley will shortly commence in the Tribune the publication in weekly chapters of a treatise on Political Economy, designed more especially to elucidate and defend the policy of protection to Home Industry. He expects to bring the work within the compass of twenty to twenty-five chapters, of three or four columns each, and to treat the subject with such simplicity and directness that few can read these essays without at least realizing that the protective policy is either grossly misunderstood or deliberately misrepresented by the champions of Free Trade.
