

The Farmers' Department.

SUMMER PRUNING AND PINCHING.—There is no one point in horticulture about which there has been more discussion than that of summer pruning...

STRAW FOR HORSES.—The value of straw as a feeding substance was never better proved than by the following fact related by a correspondent:

A farmer having a large number of wagon horses, had frequent occasion for the veterinary surgeon, until they were recommended by him to mix a certain portion of the fine cut straw with the clover hay.

The fact is, the food was too rich or too mucilaginous, for I have often been told that fine cut hay, un-mixed with straw chaff, balls in the stomach, and thus is deprived of the action of the gastric juices.

TRIMMING LAMPS.—A correspondent of the National Agriculturist writes as follows to that periodical: Some always use a pair of shears to trim their lamp wicks; I never do. A better way, and one which I invariably practice, is to pinch or wipe off the crust with a piece of paper; you may keep a piece of cloth for the purpose if you desire.

LEMON DUMPLINGS.—Mix with ten ounces of fine bread crumbs half a pound of beef suet, chopped fine; a large tablespoonful of flour, the grated rinds of two small lemons, or one very large one; four ounces of pounded sugar, or if wished very sweet, more; three large or four small eggs beaten and strained. Divide these into four equal portions, tie in well floured cloths and boil an hour.
