—C. Musser, a member of the special chem. class, was compelled to leave college for his home on Monday last. Charley has been troubled with his leg for some time, having received a very severe sprain while he was playing foot-ball last fall.

—Girls, take time by the fore-lock; do not let your golden opportunities slip by unnoticed, this may be the last chance that some of you will have. If you have not decided, do so immediately and never mind the maximum, "Look before you leap."

—A party of thirteen of our students went to Bellefonte on Thursday night last to see "Erminie" and from the reports that are out about Porter, Hickman and Struble, the affections of some of the ballet girls must have been in a blighted state when the sled started for P. S. C.

He is greatly in need of an instructor, to show him how to use the apparatus and how much to use it.
