

suckers, in order that I may have variety in my collection."

We are glad to note that the P. S. C. Telegraph Co. has again come to life, with the following officers: Pres't, H. R. Leyden; Vice-Pres't, J. A. Hunter; Sec'y and Treas'r, T. A. Gilkey; Linemen, C. M. Green, J. A. Hunter and F. H. Bates. Now that the work has started let it be continued, and let us see what improvement can be made before the end of the year.

Jake Struble, of the mechanical engineering department of the class of '89, has made the drawings of a wind-engine, and is going to construct the engine, which is of his own design. The drawings show thoughtfulness and care in design. The governor is the distinctive feature of this engine. It is constructed on an entirely new plan, and may become quite largely used in the construction of wind-engines, as this is the sticking point with all builders. We await with interest the completion of the wheel.

For the first, the "White Caps" have begun their warning. Their office is situated on fourth floor, Prepdom. They expect to do active work from this time on to the end of the year, as they are now thoroughly organized.

Joseph Reeves, a post-graduate student in electrotechnics, has accepted a position in Huntingdon, as electrician at the reformatory. There seems to be a great demand for men who have a practical knowledge of electricity. Nearly all of our students who have taken such a course, have been called to good positions.

Mr. R. P. Swank, of Class '89, is one of the busiest men in college at present, being engaged on his competition essay for the contest in which prizes are offered by the American Protective League to the undergraduate students of Senior Classes of Colleges and Universities in the United States for approved

Essays on, "What are Raw Materials? Would Free Raw Materials be Advantageous to the Labor Industries of the United States?"

The ladies of the College whose ages are between fourteen and nineteen have organized a Society to be known as the Younger Ladies of the College. Sociables will be held every two weeks at their different residences, at which there will be carried out a choice programme, consisting of music, both vocal and instrumental, games, dramas, and the reading of a humorous paper. Ladies, we congratulate you, and hope your Sociables will be a success.

Have you seen the double-sided, barrel-shaped, spy-glass, suspended by a black tape from the neck of Robert Waring Wieland? He states that this glass was procured for the sole purpose of bringing to light the hidden mysteries of Natural History.

Recognizing the growing necessities of this Institution, we, the undersigned, this day make known to the public the organization of the corporation known as "Bouncing Shakers." The object of this organization is, to give opportunity to any student to be awakened at any hour he may designate. The main office is 594, to which all orders may be sent by mail, telephone, or telegraph, where they will receive prompt attention. The Superintendent's office is 590. He will have charge of the working force. The rates will be reasonable, considering the work done. A gentle tap on the door and told to get up, five cents; if door is left unlocked and the party wishes a gentle shake, fifteen cents will pay for the privilege; but to an old inveterate, who will require the services of the Superintendent, two men and a club, charges will be made according to the risk run. In sending in time at which it is desired to be awakened, please state time you are in the habit of rising, that we may form an intelligent idea about how many men will be required. We think a trial will convince you that this organization fills a long-felt want.
