EXCHANGES.

The Haverfordian for March, contains an article "Student Life in a German University." by Robert W. Rogers. He gives three reasons why German Scholars are ahead of all the world. The final reason, "Will American students learn that work is better than play, and that work only wins and certainly wins?"

"Go West, Young Man" (with variations), in *The Wake Forest Student* would be wholesome reading for the young man who has had the idea that in the West money grows on trees.

The Lantern does not favor compulsory chapel exercises, neither does it oppose it. It simply takes the stand that so long as the rule of the board remains as it is, students should attend chapel.

The March number of *The College Student* has some good literary productions.

Some good points in regard to election of editors is given in the *Swarthmore Phoenix*.

A large number of exchanges are on our table, which we have not time to examine critically, nevertheless they are always welcome.
