

COMMUNICATIONS.

Mr. Editor:

I noticed in the account of the '93 versus '94 foot-ball game, which appeared in the recent issue of the FREE LANCE, that it was stated that "considering both teams the soph's really lost the game by their lack of practice." Such a statement is a mistake and unfair to '94. It is known to all that both teams practiced their hardest previous to the game and it is but justice to both elevens to state that the sophs lost the game not by lack of practice but by the superior strength or playing of their opponents.

STUDENT.

PERSONALS.
