

Carey, Princeton, '93, lowered the world's amateur record for 75 yards, May 9th, from 7 21-3 seconds to 7 3-5.

At the recent athletic meeting between Yale and Harvard, Finlay threw the hammer a distance of 108 feet 5 inches.

The Princeton freshmen passed resolutions against hazing next year. Their action is generally approved.

The grand stand on Amherst's new athletic grounds is one of the finest in the country and cost \$9000.

The Ohio State University will hereafter receive from the State an annual appropriation of \$100 000.

The total receipts realized from the play of *Antigone* at Yale amounted to \$5,000, of which sum about \$2,000 was net profit.

About 1400 members of Cambridge University have signed resolutions protesting against the admission of women to the University.

A campus containing about seventy thousand acres, with driveway seventeen miles in length, is connected with the new Leland Stanford University at Palo Alto, Cal.

The annual report of President Eliot, of Harvard, announces that hereafter the professors of that institution will receive \$4,500 a year, and assistant professors \$3,000.

The new athletic grounds of Columbia College are large enough to enclose a football and baseball field, tennis courts and tracks. The grand stand will hold over 1,600 people. The lower part of the grand stand is to be used for dressing rooms, baths, bowling alleys and a ladies' waiting room.

The University of Michigan has issued a new calendar showing a total attendance of 2420 students. The annual rate of increase in the number of students during the first three years has averaged thirteen per cent. The faculty now numbers 133, an increase of seventeen since last year. 14,000 copies of the calendar are issued.

EXCHANGES.

The recent issue of the *Lehigh Burr* contains a very good editorial on the unfairness of final examinations, from which we clip the following :

"It would be interesting to know by what means the professor or instructor determines how much a man should be able to do in a specified time. If we take the daily recitations as a criterion, then the examination standard is that of the smartest, not of the average man, for surely half an hour is less than the usual time for working a problem in the class room, and in the examinations in mathematics work equivalent to ten problems is expected to be completed within a nominal four hours, and it has been stated repeatedly that only by continuous writing, without a moment for thought, could the entire ground be covered.

By the distribution of a few days' lessons over the whole term more time would remain at the end before examinations. With a little more thought on the subject, only a fair number of questions would be required. These suggestions are a year in advance, but they derive their force from present facts, and a change in the direction suggested would meet with general approval and tend to make the examinations what they are designed to be, and, we are glad, their aim is—a test of every man's knowledge, with the motto of a 'a fair field with no favor.'

The Delaware College Review, after a long absence, comes to us in its old time good form. "Self Control" is the subject of a very fine article, from which we take the following :

"To be silent is not to be churlish. Idle speech adds nothing to knowledge, nor embellishes thought, but it takes away from us that respect which it is our right to exact from others. It cannot be but that silence is the guard to prosperity. Have aught in your mind which you would do, and tell it; another will profit by your communica-
