

'91. Hugh Hamilton, Jr., is filling a position in an electric light and power station in Richmond, Va.

Ex-'91. S. G. Allen was recently admitted to practice in the Warren county bar. His address is Allan Block, Warren, Pa.

'91. W. A. Bartley has been appointed as instructor of Industrial Training at the Fisk University, Nashville, Tenn.

'91. F. N. Weidner has returned to take a post graduate course.

'90. J. A. Hunter has lately gone to Savannah, Ga., where he will fill a position in a school.

'90. Potter M. Brown is engaged in developing mica deposits, in North Carolina, in which he is interested.

'90. W. M. Camp is serving on an Engineer Corps in California. This corps is surveying a route for a railroad from the central part of Cal. to Mexico.

'89. A. A. Patterson, who is reading law in Pittsburg, accompanied his brother to P. S. C. at the opening of the term.

'89. J. D. Hunter, formerly teacher of the Milesburg grammar school, has been elected to the principalship of the Gettysburg public schools.

'89. J. P. Jackson has been appointed to a position in the Mechanical Engineering department.

'88. Miss Carrie Hunter is employed in the Normal at Macon, Ga.

'88. Geo. C. McKee, who is the head of the Industrial Training department in the public schools of Seattle, Wash., spent his vacation at his home in State College, this summer.

'87. Miss Grace Moore has accepted a position as teacher, at Bedford.

'85. D. C. Jackson has been made Professor of Electrical Engineering, in the University of Wisconsin, at Madison. He was formerly employed by the Edison Gen. Electric Company.

'84. M. W. Lowry has recently been made the Republican candidate for District Attorney in Lackawana county, Pa.

—Mr. J. A. Fries, one of the assistant chemists at the Experiment Station, visited his home in Sweden during the summer.

—Dr. Pond while in Germany collected a valuable lot of material which will doubtless lend great interest to the chemical lectures.

—Mr. Frank Kennedy, the instructor in the Mechanic Art shop, has resigned his position, and is now ready to take contracts for buildings.

—Miss McElwain, who has spent the past year travelling through Europe, has returned and is again taking charge of her department.

—Miss Willard, the instructor in music, is in Boston, Mass. She will not return until the winter term opens. During her absence Miss Wyman of '92 will officiate.

—We regret to learn that Prof. T. S. Hunt, who has so faithfully and successfully discharged his duties at the college, has accepted a call to the chair of Agriculture at the Ohio State University.

—The Institution was honored by a visit from Dr. Robert Warrington, who was associated with Sir J. B. Larnes and Dr. Gilbert at the famous Rothemsted Experiment Station, St. Albans, England. The visit is of special interest from the fact that Dr. Warrington was working in the Chemical Laboratory at the time when the late Dr. Pugh, first president of the college, was engaged in his famous research upon nitrogen assimilation.

—Among those of the old students who visited the college recently, were ex-'92 Thomas Strouse, who is serving on an engineering corps in Baltimore, Md.; '90 James Foster, chemist in Virginia; '91 William A. Bartley, Bellefonte; '90 H. B. Leyden who is employed in the Edison General Electric Co., Chicago, Ill.; '83 Rev. W. C. Calder missionary in Bhamo, Upper Burma, India; '87 W. F. Strouse who has
