These games are not merely for the benefit that will be derived the individual classes, but are a means of bringing out and developing players for the college team, and it has been proven by our success in foot-ball that the above method is the best possible way of creating an interest in any particular sport or in general athletics.

COMMUNICATION.

MR EDITOR :

The method of management of the library has of late been the cause of considerable comment among the body of students, some no doubt unjust, but the larger part well worthy of consideration.

The students, except under special permit, have no access whatever to any of the valuable works so necessary to the thorough acquaintance of the subject under their consideration, because the library hours conflict with recitations and practicum and the library is closed during the evening.

As a remedy for this state of affairs might be suggested the method in use in our large college and circulating libraries. Let the student pay a small fee for the use of the library and be allowed access to the shelves once a week, and have such matters as damages, etc., fixed by a code of regulations similar to those in use in these larger libraries. This would give the student the reading he desires in the quietness of his room and will give some help in keeping up the library.

On account of the present system there is a large number of students who cannot get the

reading they need. In justice to these and the large body of students it is imperative that something be done to remedy this state of affairs

W. H. K.

PERSONALS.

Ex-'93. J. F. Musser, who has been located at Williamsport, Pa., has gone to Allegheny City, where he is employed with Strasburg and Joseph's.

'91. Hugh Hamilton, Jr., who was employed with the C. and C. Electric Co., of New York, has been troubled with sickness for some time past. He is now at his home, Thompsontown, Pa.

'90. Geo. R. Meek, at the recent election, was a candidate for Assistant Burgess of Bellefonte.

'90. Potter M. Brown is now filling the position of assistant manager of a mica manufacturing company, at Plumb Tree, N. C.

Ex-'86. Archey Allison has become a partner with Mr. S. M. Buck, of Bellefonte, in the Logan Machine Works.

'86. G. L. Holter, chemist at the college Experiment Station, has been elected to the chair of agricultural chemistry in the University of Oklahoma. He will leave the college for his new post the beginning of April.

'85. C. C. Chesney, who has been engaged in the Stanley Laboratory, Pittsfield, Mass., for several years, was, at a recent organization of the Stanley Manufacturing Company, made one of its members. This company controls all the Stanley interests and is doing a good general business.

'82. J. G. White, who is agent for the Edison Gen. Electric Co., has his brother W. H. White, ex-'91, stationed in Omaha, acting as assistant agent.

'82. I. P. McCreary, of Osceola Mills, Clearfield county, who is employed by the P. R. R., visited us the 19th ult. It has been but a few weeks since he had his leg broken, by a heavy
