**The Only Machine.**

The only machine ever invented which will add all the columns at one time by the simple touching of keys, and nothing more.

The only machine ever invented which multiplies and divides by automatic keys.

Absolute accuracy and twice as quick as the best accountant.

No lever to operate. Nothing to do but touch the keys. Simple, light, compact, durable.

A book-keeper's or engineer's time is too valuable to be spent on mental computing

when he can do the work on the Comptometer in much less time and with absolute accuracy.

Write for Pamphlet.
