

rather abruptly: "Mr. Ford, will you please close——" but he got no further; Ford shut his book with a snap and tried to look innocent, while the professor finished with, "that window behind you "

Compulsory church attendance is a collegiate institution which comes in for its share of hard knocks at the hand of the undergraduate. Nearly every college where the system is in vogue has its story of attempts at evasion of the system. All are similar, and to tell one is to tell all. The most typical, perhaps, is that of the misguided youth who was called before the registrar one morning and asked if he had attended divine service on the previous Sunday. "I did," was his reply. "At what church were you present, Mr. Blank?" "At the First church." "Is it possible? Why, to my knowledge there have been no services there for a month." "Oh, but, sir, I should have said the first church I came to."

A story current at the writer's college is of two young men who went to call upon a young lady of the town. Their hostess had been dancing the evening before and was tired. They hadn't been dancing and so did not know that two hours had passed. So, in despair, the young lady resorted to strategy and managed to turn the conversation until she could finally propose the riddle of the eleven ciphers and the six lines:

ooo ooo ooo oo | | | | | |

The riddle was old, but they were young, and could not make the sentence. So the young lady quickly arranged them thus:

good qod do qo (Exeunt.)

We conclude with a pun which was made at a farewell party given by a college faculty, to one of their colleagues who was shortly to go abroad. The departing brother rejoiced in the name of Levi. At the close of the reception it had been arranged to make a gift of some books to the guest of honor, and one of the professors had been chosen to make the presentation speech. His opening sentence was: "Friends, this gathering has its Genesis, in the Exodus of Leviticus from among our Numbers."

And the end is not yet. Every day some good *mot* comes into
