over and I was no longer a useful member of the college community,' as Mr. Needham says.

"I left college because I intended to come back next year as football coach, and will finish up my course then."

We print the above articles in an effort to place State in the true light.

Library Hours.

Week Days: 7.55 a.m.—10 p.m. Sundays 3-5 p.m.

Recent Additions to the Library.

Students' Edition of a Standard Dictionary of the English Language.

MINING DEPARTMENT

New York State Museum—Report on Paleontology.

Agricultural Experiment Station

The report of the Pennsylvania Station for 1903-04 is just being distributed, the printing of it having been seriously delayed. The report contains a full account of the work of the year. As of special interest may be noted the experiments upon the growth of Sumatra tobacco under shade, which are quite fully illustrated, the tests of varieties of wheat, oats and potatoes, the experiments upon the use of green forage crops for dairy cows and those upon the value of shelter for fattening cattle. Interesting results were also obtained in the spraying of grapes for black rot. The report of the Director calls special attention to the need of increased funds for the Station work, a need now partially supplied by the action of the Legislature appropriating \$10,000 for two years for the maintenance of the Station.

The report will be sent free of charge to residents of the State, as far as the limited supply available permits.

Miller Honored.

Under a law recently enacted by the Legislature, Governor Penrypacker has appointed Norman G. Miller, '04, of Chambersburg, assistant State Zoologist. This is a great honor for Miller. Since he graduated last spring he has been connected with local Experimental Station. He graduated from the course of Agriculture.

Miners "Feed."

The members of the Mining Engineering Society congregated at McAllister Hall last Friday evening and participated in a banquet. President Dalburg acted as toastmaster and many of the members responded to toasts. Dr. Wadsworth's talk, especially, proved interesting. Before the banquet broke up the members of the society indulged in an impromptu stag dance. Several members furnished music for the occasion.

COLLEGE ORBIT.

Arrangements are being made for another baseball game between teams composed of members of the faculties of Lafayette and Lehigh. The Lafayette team won last year by a score of 15-2.—The Lafayette.

What's the matter with a State College faculty team.

Ralph O. Roberts, a student and prominent athlete at the University of Ill., was recently killed in a railroad wreck, and his administrator sued for \$10,000 damages. Judge Wright of Champaign county, Ill., dismissed the case, however, on the grounds that no one was dependent on Roberts for support, and that, being a college student, he was really a scource of expense to his parents. In short he stated that a students life has no money value.

Local.

Keck, ex'06, returned to College Tuesday for the purpose of taking some examinations preparatory to entering 1907,
