WEDNESDAY OCT 31

- 6.30 P. M. Electrical Engineering Society.
- 7.15 P. M. Natural History Club 205 Main.

THURSDAY, NOV. 1

- 7.00 P. M. 1908 La Vie Board 373 Main.

Mechanical Engineering Society.

At a regular meeting of the Mechanical Engineering Society on Friday evening, the principal of the Refrigerating Machine was discussed. The subject was entered into by all members of the club, but particularly by Prof. Reber, P. A. Bevan and C. G. Bower, who prepared special papers upon this subject and read them before the society.

Technical Experiments.

A few sample lamps were used in the lighting of the Auditorium during the convention of Women's clubs last week, making a distinct epoch in the development of incandescent lighting in this country. One of the lamps was that having the new metallized filament, which gives fully a third more light for a given amount of power than the ordinary type of carbon filament. The other was the tantalum filament lamp, which gives almost twice the light of the carbon filament. In other words, the cost of lighting a house with the metallized filament or tantalum filament lamps will be only one-third or half as much as with the ordinary lamps.

Hot Hot Great Excitement!

On Saturday, November 3rd, at precisely 2.30 p. m. by "Bottle's" King's stop watch, the terrific, terrific, tenacious, tumultuous Tumblers led by "Turtles" Staud, the Tutled Turk, will scuttle upon Beaver Field to do battle with their most ancient rivals, the slim, sleek, shadowy, slab-sided Toothpicks, headed by "Sunny" Caughy, the Dog-faced Youth. Everybody out to witness the awful slaughter of the innocents! All upperclassmen who do not bear the Green Emblem are eligible.

Famliest Game of the Century. The Temptations of Eve will be fully exploited!

Villanova Cancels.

As we go to press we are informed that Villanova has cancelled her engagement with State for next Saturday. Manager Thompson is endeavoring to arrange a game with another strong team.

Convention of Club Women.

Judged from the standpoint of those who have the interests of the College at heart, the meetings of the State Federation of Pennsylvania Women held in this place last week were of great importance. No other one event, with the possible exception of the Harrisburg trip, has done more to bring the College to the attention of the people of Pennsylvania; for the one hundred and forty delegates here last week represented 15,000 club women of the state. In addition to the large number, it should be remembered that these women come from the best element in every community.

Miss Kate C. MacKnight of Pittsburgh, president of the Federation, was unable to be present until Thursday. In her absence, the three vice-presidents took turns in presiding. Tuesday afternoon was occupied with inspecting the buildings and grounds, and in the evening Miss Agnes Repplier of Philadelphia, a writer of considerable reputation, talked on "The Temptation of Eve." The subject matter of her talk was woman's weakness in the question of dress. Considerable time was consumed in the hearing of committee reports. As the Federation has twenty odd committees, it will be seen that the reports took up no small part of each session.

On Wednesday afternoon, Mrs. G. G. Pond presented the question of the establishment in the College of a Federation scholarship for young women. Although the financial condition of the treasury does not warrant the establishment of scholarships at the present time, it is likely that favorable ac-
