STATE COLLEGE, PA., JANUARY 17, 1907.

Price Five Cents.

The Revolution in the School of Agriculture.

At no time in the history of the College has any school or department had so much of a shake-up as has recently occurred in the School of Agriculture and the Experiment Station.

Dr. Thomas F. Hunt, Professor of Agronomy, of Cornell University, has been elected Dean of the School of Agriculture and Director of the Experiment Station. He is spending two months—December and January—in preliminary organization at the College and will come permanently to assume the duties of his dual position July 1st next.

Upon the College staff in the School of Agriculture, Mr. J. F. Breazeale, of the Bureau of Soils, United States Department of Agriculture, Washington, D. C., has been appointed Assistant Professor of Experimental Agronomy. Mr. John H. Barron of Nunda, N. Y., has been appointed Assistant in Experimental Agronomy. Mr. C. F. Shaw, Field Expert in the Bureau of Soils, has also been appointed Instructor in Agronomy for three months—January 1st to April 1st. Mr. Joseph E. Dunipace of Toledo, O., and who is a graduate of Oberlin and Leland Stanford Universities has been appointed Assistant in Agricultural Chemistry.

In the work of the Experiment Station Messrs. Arthur W. Bromwell and C. B. Given have been appointed Assistant Chemists. The former is an alumnus of Swarthmore while the latter graduated from the New Mexico Agricultural and Mechanical College.

State 66, Wyoming 23.

Our Varsity five displayed improved form against Wyoming Seminary last Friday evening in the Armory. Some of the passing and shooting done by State's men was great, and our team begins to look good as a winning combination. Dubarry's shooting was splendid, also that of Barnett and Herman, while Captain Waha played a strong game. All the players showed that helping spirit which means good team work. For the visitors, Hankey and Frantz did excellent work at all stages. In every particular State's men, individually and collectively, showed better form than in the Juniata game, which State won by the score of 61 to 1, the visitors scoring just before the whistle blew. The score.

STATE 66	WYOMING 23
Barnett, Dillon . . . forward . . .	Hankey, Jones
Ticknor, Funston . . . forward . . .	Frantz (Capt.)
Waha (Capt.) . . . center . . .	Liebens
Herman, Thomas . . . guard . . .	D. Cross
Dubarry, Mitchell . . . guard . . .	R. Cross

Goals from field—Dubarry 14, Barnett 7, Waha, 3, Herman 4, Ticknor 3, Funston 1, Hankey 4, Frantz 3, Liebens, D. Cross 2. Goals from foul—Waha 2, Frantz 3. Referee—McIlveen, State. Timekeepers—Harding and Gamble. Time of halves—20 minutes.

Baseball Practice.

The first call for freshman and sub-freshman baseball candidates is issued for Saturday, January 26th, at 1:30 p. m. in the College Armory. All candidates will please wear gymnasium shoes, and will hand their names and names of their prep schools to Assistant Director Jeffery at the gymnasium any time previous to January 20th. Signed, H. D. Mason, Captain.

Professor and Mrs. F. L. Pattee entertained the members of the two debating teams at dinner on Friday evening. Needless to say, the boys all spent a most enjoyable evening.

Berzelius Society.

The Berzelius society has adopted a new method for making its meetings of greater value to its members. Under this new plan it is intended to secure some prominent man each month to lecture at one of the regular weekly meetings.

It was expected that Dr. Halleck of the Schultz Mineral Water Co. of New York would speak on the eighteenth of this month, but as he cannot come on that date his visit has been postponed until March, when he will give an illustrated lecture on the manufacture of artificial mineral water in the United States.

During the latter part of February, Dr. Frank J. Pond, '92, brother of Dr. G. G. Pond, and Assistant Professor of Engineering Chemistry at Stevens Institute will deliver an illustrated address on the manufacture of water gas. Dr. Pond has made special investigations along this line and is a recognized authority on water gas.

It is hoped that during the year the society may be favored with addresses by Dr. Wiley of the Pure Food Commission and Dr. Dudley, Chief Chemist for the Pennsylvania Railroad.

It was decided last Friday night to give up the proposed trip to Germany, as not enough men could be secured to join the movement. The regular Eastern trip to New York, Philadelphia, and other points will be taken during the spring vacation.

Boxing, wrestling, and fencing classes are to be formed in the near future. Each class will meet twice a week.
