#### Mechanical Topics.

The Cox mechanical stoker was the subject of Fear's talk before the Mechanical Engineering society at the last meeting. This stoker is of the chain grate type, fed by coal from overhead bins, and it offers some advantages over other forms. These were described and illustrated, and the details of the installation and arrangement of the Cox stoker in connection with modern types of boilers were given. Mitchell gave an extensive discussion of automobile engines and their accessory Various types of motors, parts. carburetors, and sparkers were considered, and the advantages and disadvantages of each system were brought out.

A girl is usually very willing to strike a match if the man has money to burn.

## THE STATE COLLEGIAN

## ALUMNI NOTES.

Mr. J. H. Himes, ex-'07 was a recent visitor at the college. Mr. Himes is now a general agent of the New York Life Insurance Company, with headquarters in Pittsburg. He has a large district with a number of agents under his direction and seems to be prospering.

P T. Kamerer, '06, is now in the meter manufacturing department of the Westinghouse company in Newark, N. Y. His address is 78 James street.

## Have You Seen The READYFILL FOUNTAIN PEN "The pen that fills itself." No more ink spotted fingers. The "Readyfill" writes when you are ready. No need to shake it to start the flow of ink A patented split feed makes dripping impossible Every college man should have a reliable fountain pen J. B. Watson, Agt., 339 McAllister

# Men's New Spring Suits

Particular dressers can be garbed in Galments Ready-to-Wear

[Isn't \$25 rather steep for a ready to wear suit? a man inquired the other day. Said he could get a suit made to order for that. So he can. But—to get a suit the equal in every way of one here at \$25 he'd have to pay at least \$40. Catch the point? Better yet, our suits at \$18 to \$28 are also equal to finest custom made, and all are less in prices than equally as good suits made to order.

"iThe man who designs our \$25 suits draws a salary of something over \$20,000 a year Influence? No. One of the firm? Not at all. He gets it because he's a genius at designing men's garments that are the quintessence of style and that are the acme of fit.

Sence of style and that are the acme of fit. "[Another big advantage in fine ready-towear clothes is that a man may judge of several suits, instead of having to select from the piece goods and picture in his mind's eye how the suit will look when completed; almost as though he were choosing between a finished painting on the one hand, and oils and canvass on the other. Choice of the readyto-wear is not only wider but simplified. And we are unbiased, for we do custom tailoring, also—and do it well.

### We never had so fine an Easter showing

<sup>G</sup>|More men depend on Sims each year for then garments—men who know dress and its fine points. The man who wants to keep right up to the latest style, and the more conservative dresser who wants the latest; but not the extremes in clothes—the whole gamut of style is met in the assortments here. We satisfy every good taste in dress, and the growing clientele and business attest the success of the Sim ready-to-wear clothes.
