Interclass Basketball Situation.

Judging from the present outlook, the freshman-sophomore basketball game next Saturday night in the Armory will be one of the most interesting of the season. Both classes are working hard, and the men are showing marked improvement. Waha, the varsity captain, has been elected captain of the sophomore team, and the experience he has gained in the year's work will prove valuable in training the class team. On the other hand, Funston, who has been elected captain of the freshman team, has done excellent work during the whole season, and will bring out the best team that is possible under the circumstances.

At the class meetings held a few days ago W. H. Henderson was elected manager of the sophomore team, and G. E. Ogilvie of the freshman team. It would be difficult to predict the result of the game, for both classes have material and are putting forth every effort to win.

Baseball Schedule.

And, so far as we can learn,
He stood in perfect safety, for
He was too green to burn.—Ex.

Have You Seen

The READYFILL FOUNTAIN PEN

"The pen that fills itself."
No more ink spotted fingers.
The "Readyfill" writes when you are ready. No need to shake it to start the flow of ink. A patented split feed makes dripping impossible. Every college man should have a reliable fountain pen

Men's New Spring Suits

Particular dressers can be garbed in Garments Ready-to-Wear

"Isn't \$25 rather steep for a ready to wear suit? a man inquired the other day. Said he could get a suit made to order for that. So he can. But—to get a suit the equal in every way of one here at \$25 he'd have to pay at least \$40. Catch the point? Better yet, our suits at \$18 to \$28 are also equal to finest custom made, and all are less in prices than equally as good suits made to order.

"The man who designs our \$25 suits draws a salary of something over \$20,000 a year Influence? No. One of the firm? Not at all. He gets it because he's a genius at designing men's garments that are the quintessence of style and that are the acme of fit.

"Another big advantage in fine ready-to-wear clothes is that a man may judge of several suits, instead of having to select from the piece goods and picture in his mind's eye how the suit will look when completed; almost as though he were choosing between a finished painting on the one hand, and oils and canvass on the other. Choice of the ready-to-wear is not only wider but simplified. And we are unbiased, for we do custom tailoring, also—and do it well.

We never had so fine an Easter showing

"More men depend on Sims each year for their garments—men who know dress and its fine points. The man who wants to keep right up to the latest style, and the more conservative dresser who wants the latest; but not the extremes in clothes—the whole gamut of style is met in the assortments here. We satisfy every good taste in dress, and the growing clientele and business attest the success of the Sim ready-to-wear clothes.
