

### The Mining Department.

The Mining School has opened the current college year with a promising number of students. It has been a great source of disappointment to every student, however, to hear of Dr. Wadsworth's resignation which will take effect next June. The great work which this highly esteemed member of our faculty has accomplished here is quite well known to everyone. He will take charge of the School of Mines at the Western University of Pennsylvania.

Work has been begun on the extension to the Mining Building. The metallurgical laboratory will be extended two hundred feet to the rear for work in ore dressing and coal washing. The southern end of the building is to be extended one hundred eighty-six feet to provide for a museum and class rooms. Plans for an addition to the northern end have also been made.

Mr. H. I. Smith, '07, will assist in the metallurgical laboratories while taking post graduate work.

### The 1909 Memorial.

During the summer vacation the stone which is a memorial to Dr. Atherton from the class of 1909 was placed on his grave beside the Auditorium. It is a fine piece of Barré granite covering the entire grave and is very plainly lettered. The effect is one of quiet dignity and simplicity. This memorial was given by the junior class from the damage funds returned in their sophomore year. The damage fund for the junior and senior years is to be held in trust by the college, and will be used to provide some useful gift to the college. The nature of this gift has not yet been decided upon.

H. D. Mason, '07, visited the college this week. He has been connected with the Dexter Cement Co. at Nazareth, Pa., during the past summer.
