

The Chemistry Annex.

Our readers will recall the fact that \$70,000 was appropriated by the recent Legislature for the erection of a portion of a building for the Department of Chemistry but that the Governor's veto axe cut off \$50,000 of this sum, leaving only \$20,000 with which to effect the needed relief. After a careful study of the situation, the Executive Committee concluded that it would be necessary to use this \$20,000 for a temporary instead of a permanent building, as in the case of the Engineering Annex and the Mining Buildings.

Mr. J. Herbert Hall, of Huntingdon, the architect, has completed the plans and work will be started at once. The structure will be directly back of the present building and will extend across the west end of Beaver field. It will be two stories in height, 100 feet wide, and 135 feet in length. The upper floor will contain a large lecture room capable of seating more than 500 students. The remaining space in the building will be devoted to class rooms and a laboratory for qualitative work which will accommodate 250 students. All necessary equipment is being ordered and it is hoped to have the new structure ready for use at the beginning of the second semester.

Gordon Weaver, '05, is assistant superintendent of the Animas Power and Water Company, of Silverton, Colorado. During the winter months only he acts as cashier of the company.

Dr. and Mrs. Gill are moving into the house above the Library formerly occupied by Professor Foss.

**"International"
Tailoring Co.**

THE name International is all you need to know about a suit. It signifies *Correctness, Dignity and Value* and all that goes to make perfection in *Made-to-Measure Clothes*. A call is necessary to convince you of their enormous facilities to render you the *service* you are *looking for*. All the newest modes and the biggest line of samples are awaiting your inspection.
