

WM. C. PATTERSON  
For 36 Years Superintendent of Grounds and Buildings

Reading by Mr. F. Hopkinson Smith.

The fourth entertainment of the Association course will be given on Friday evening, Feb. 7, at 8 o'clock, in the Auditorium. It will consist of a number of readings from his own works by Mr. F. Hopkinson Smith. In addition to being an author of great repute, Mr. Smith has achieved marked success as a civil engineer, having constructed some of the most difficult of Uncle Sam's light-houses and breakwaters along the new England coast. With the utmost skill, Mr. Smith has used as material for some of his best stories, the splendid characters with whom he became acquainted during this work, and some of these stories will be given on Friday evening. Another number on the program will be the beautiful tale of "A Kentucky Cinderella," and the immortal Colonel Carter, of Cartersville, Ga., will make his ever-fascinating bow. Mr. Smith has achieved success in the realm of pictorial art as well as in science and literature, being ranked as one of America's best painters. He reads as well as he paints, writes or builds, and a unique treat is in store for those who plan to hear him next Friday.

It is impossible to judge the International Clothes by the price. There is nothing about them that is similar to others—so comparison is out of place. They stand alone. Though popular priced they are far in advance of those that cost you double. The difference lies in the fact that the International Tailoring Co., of New York and Chicago have different methods and are able to render service of the highest order at a price that none can imitate.
