

On the Trail of the Immigrant.

One of the most interesting lectures ever given in State College will be that on "On the Trail of the Immigrant" by Dr. E. A. Steiner on Friday the fifteenth. Dr. Steiner is able to speak with special force to Pennsylvanians because he has made a study of immigration in this state, and is thoroughly conversant with the conditions. Dr. Steiner is to sail this month for the southern countries of Europe where he will study at first hand the conditions of the people who are emigrating to this country, and the reasons why they leave their own homes. He takes with him a dozen college graduates

Dr. E. A. Steiner

who will study with him with the aim of becoming experts on immigration able to aid in the solution of the problem of making Americans out of these aliens. The fact that Dr. Steiner was selected for this undertaking is evidence of the high repute in which he is held by the authorities on immigration. The lecture on Friday evening will be popular in character, and no student who wishes to be informed in one of the greatest problems that confronts this state can afford to miss this rare opportunity.

W. J. Garrison, '07, has resigned his position with the Chicago, Milwaukee and St. Paul Ry. and is now with the Fox Silica Sand and Stone Co. with headquarters at Dagscahonda, Pa.

The most glorious stock of good things we ever offered our trade, consisting of fine clothing, hats, shirts and neckwear and all articles included in a regular line of men's, youth's and boys' furnishing goods now ready in profusion
