

It was a well-played, well-attended game with plenty of exciting moments and as Penn State's eleven played the game to a man and lowered the score made by the Redskins last year by six points, it is an encouraging sign for the success of Captain McCleary's team this season.

With Our Opponents.

The University of Pennsylvania, State's next opponents, won from Bucknell on Saturday 16 to 0, the Quakers scoring all their points in the first half and making many substitutions for the second period. Our game in Philadelphia on the tenth with Penn will be a source of comparison of the strength of Bucknell's eleven and our own. The Lewisburg people say now that one train will not hold the rooters who are coming for the big home game on November 7 with the Bucknell team.

The Geneva college team played a 0 0 contest with Allegheny college, while West Virginia took Westminster into camp in easy fashion 22 to 0. The Mountaineers promise to do things here later on and their claim is to be heard at least, since they held Penn to a 6 0 score.

Cornell had some trouble in defeating Hamilton 11 to 0 on Saturday, but there is no fear that the strength of the Ithacans will not have increased tenfold when McCleary's men go on Percy Field on October 31, especially as the white and blue has triumphed in the last three matches at Cornell—two in baseball and one in football.

The Navy and University of Pittsburg both have strong teams this year. The former defeated Rutgers 18 to 0 and "Pitt" won from Mount Union by a score of 26 to 4.

With the Indian game over, six hard games still remain—Penn, W. U., Cornell, Bucknell, Navy, and W. U. P. Manager Postlethwaite's schedule is giving the Penn State eleven the hardest struggle in its history to keep in the fight. The Geneva contest is the only game which looks easy now, and captain McCleary's men surely have their work laid out for them.

Professor James B. Whitmore.

Professor J. B. Whitmore, who was recently appointed to take charge of the department of Drawing and Descriptive Geometry in the School of Engineering, was born in Evansville, Ohio. He received his early education at the Akron High School and at Buchtel college. He was later graduated as an engineer from the Massachusetts Institute of Technology. He has also, in addition to the educational training given above, taken special post-graduate work at the University of Ohio.

Professor Whitmore has had quite a varied and valuable experience in the field of practical engineering design. He was first connected with the Engineering Department of the Diamond match company, as a draftsman and designer. This was followed by his connection with McGeorge Sons, Consulting Engineers, of Cleveland, Ohio, as a designer; with the Brown Hoisting-Machinery company, of Cleveland, Ohio, where he was in charge of the crane designing and estimating department; and with the Jeffry manufacturing company of Columbus, Ohio, as their designer.

Professor Whitmore's education and practical training fits him particularly to take charge of the important department to which he was appointed at this college.

The Electrical Feed.

About forty seniors, the same number of juniors, and the instructors in the electrical department enjoyed a well arranged banquet at McAlister Hall Tuesday evening. The occasion was the annual dinner tendered to the senior electricals by the incoming juniors. The program included toasts by Messrs. Platt, Wilcox, McNary and Professors Jackson, Kinsloe and Monroe. Other talks were given by instructors and students. The gathering ended with songs, yells, and a flashlight picture.
