Pressing The Clothier Cleaning

STUART * BLOCK

The College of Hawaii-Nei.

The following is taken from a recent issue of the Pacific Commercial Advertiser, published in Honolulu, and will be of interest to those who knew Prof. Gilmore when he had charge of the department of agronomy here last year.

"With the prospect of additional classrooms and other quarters to be finished by October the College of Agriculture and Mechanic Arts is beginning to assume the proportions of an educational institution which has a splendid future before it. President Gilmore, who arrived recently from the mainland, has taken up his office duties, and other instructors are locating themselves in the present building.

On the Manchuria there arrived yesterday three additional members of the faculty selected by President Gilmore. Those included Mr. Porter, professor of physiology and anatomy. He is a graduate of the

College of Agriculture at Ames, Ia. Mr. Porter has been engaged in active teaching and investigation work at the Maryland Agricultural college.

Warren G. Ross is a recent graduate of the Pennsylvania State College and has just entered the service of the teaching ranks. He will take up agricultural work. Raymond G. Severance, also a graduate of the Pennsylvania State College, will take up the department of physics. Others already here are Miss Hunt, who will assume charge of the department of domestic science, and Mr. Morgan, of the chemistry division.

President Gilmore has hopes of finding the right material in Honolulu to add to the faculty, there being vacancies yet to be filled."

Dr. A. S. McAllister.

Dr. A. S. McAllister, who has been appointed to the position of Professorial Lecturer in Electrical Engineer-

ing, is a graduate of State of the class of '98. In 1901 he received the degree of M. E. from Cornell University for post-graduate work. The same year he received the degree of E. E. here. He taught at Cornell from 1901 till 1905 at which time he was Acting Assistant Professor of Electrical Engineering. In June 1905 he received the degree of Ph. D. Since 1905 he has occupied the position of Associate Editor of the Electrical World.

Dr. McAllister has had much experience as a writer and lecturer on engineering subjects. He has been granted several patents on alternating current machinery, and is the author of the text book on "Alternating Current Motors" which is used here at college. He is a member of the New York Electrical Society, the Illuminating Engineering Society, the International Electrical Congress, the National Geographic Society, and is an associate member of the American Institute of Electrical Engineers. His accurate knowledge of electrical subjects and his experience as a lecturer fit Dr. McAllister exceptionally well for the position which he is to fill here.

Award of Scholarships.

At the last meeting of the General Faculty, the following appointments were made:

The John W. White Sophomore Scholarship, Morell Smith.

The Louise Carnegie Sophomore Scholarships: P. B. Castro, DeVoe Mead, Abraham Wasser, Alton B. Zerby.

It has since been learned that Mr. Wasser will not return to college this year. At the next meeting of the Faculty the Scholarship will be re-assigned.

Stuart St. Clair, of Harrisburg, was awarded a Trustees' Freshman Scholarship. There were ten places to be filled, and out of eight applicants Mr. St. Clair won the only scholarship awarded.
