time. Seats for this entertainment will be on sale at 7.00 p. m. The entertainment will begin at 8.00 sharp.

The State Millers' Conference.

A committee consisting of six members of the Pennsylvania Millers' State Association was here on Saturday for the purpose of conferring with those in charge of the Experiment Station. The subject of discussion was the methods of determining the milling qualities of various kinds of wheat. The matter of making this work a permanent feature of the experimental work is being considered, although no definite plans have been made.

The members of the committee were favorably impressed with the work of the College, and it is possible that the meeting of the State Millers' Association may be held here next fall.

Stevens Institute vs. Johns Hopkins.

Cornell vs. University of Vermont.

Westminster vs. Geneva.

Hazing at Amherst has been officially abolished by President Harris. The immediate cause of this action was the injury of two freshmen.

Turbo-Generator for Power Plant.

With the addition of the Engineering Extension, the new Agricultural buildings, the large addition to the Mining buildings, and the Woman's Annex, the College electric light plant has become greatly overloaded. This overload is steadily increasing as the new developments of the College are getting under full blast. To somewhat relieve this condition for the present year, the College has arranged to install a small DeLaval turbo-generator. This generator is especially welcomed by the engineers of the College as it will open a wide new range of experimental investigation and tests for regular class sections. The DeLaval turbine wheel runs at a speed of some ten thousand revolutions per minute, and is driven by the steam as a windmill is driven by the wind. Such machines, as is well known are being installed in a great portion of the new electric light plants of the country, and as they are of recent origin, having grown to be a commercial success only within the last few years, the advantage of this unit at State College from an educational standpoint is evident.

It is hoped that the coming Legislature may see fit to add to this equipment another large unit, which will make the plant still more efficient.

Debating Teams Chosen.

The debating trials held on Friday evening resulted in the choice of the following men: first team, Morrell Smith, '11, S. J. McNary, '10, and G. W. Cochrane, '12, with H. S. Adams, '12, as alternate. The second team will consist of W. M. Smelo, '09, S. L. Faust, '10, and A. E. Miller, '12, with S. S. Levissee, '12, and B. G. Smith as first and second alternates respectively.

Dr. Runkle and Professors Garver and Cottrell acted as judges.
