STUART \* BLOCK

plied." He presented some surprising data as to the broad utility of this convenient form of fuel.

On Saturday morning November 7th Mr. Meredith, one of the engineering officials of the Pennsylvania railroad, at Altoona, gave a valuable and interesting lecture in the old chapel upon "Engine Houses and their Accessories." Mr. Meredith treated the locomotive as an operating unit and dealt with the method of handling it and preparing it for service. The subject was presented in a manner which brought clearly to the hearers' conception the extended and complex organization necessary to keep a great railroad like the Pennsylvania in operation.

Other engineers who have already promised lectures are as follows: Mr. I. C. Minick of the Engineering department of the Pennsylvania railroad; Mr. F. H. Snow, Chief Engineer of the Pennsylvania Department of Health; Mr. C. F. Mebus,

a consulting sanitary engineer of prominence, of Philadelphia.

Mr. Minick will come here either this week or next and will deliver an illustrated lecture upon "The Washington Terminal." This terminal has just been completed and represents many advanced engineering ideas.

#### Addresses and Positions of 1908 Mechanical Engineers.

G. S. Breneman, with master mechanic, Huntingdon and Broadtop Railroad, Saxon, Pa.

J. M. Coleman, with R. & P. Coal and Iron company, Reynolds-ville, Pa.
