A Notable Gift to the Library.

In response to representations made by the College Librarian, the French Minister of Public Instruction and Fine Arts has forwarded the following volumes:

First, Inventaire general des richesses d'art de la France

Second, Collections de documents inedite sur l'histoire de France.

Third, Catalogue general des livres imprimes de la Bibliotheque Nationale.

The first work will interest lovers of art, and twenty volumes of the series have appeared.

The second set is an exceedingly valuable one for historical research. It is still in course of issue, although sixty-four volumes have already been printed.

The third set comprises one of the great bibliographical undertakings of the century, a general catalogue of the printed books in the National Library of France, the largest library in the world, and containing over two million, six hundred thousand volumes. Thirty-two volumes of the catalogue have been issued, and two or more per year will follow during the next twenty years. The Library is exceedingly fortunate in this donation.
