EDITORIAL.

In another column will be seen an announcement of the program for Memorial Day here at State. The action of the sophomore class in deciding to honor the memory of Dr. Atherton is certainly worthy of commendation and is bound to receive the praise and support of every student and of every alumnus. While the present seniors are the only ones who have actually had contact with Dr. Atherton, all the rest have the results of his many years of faithfulness constantly before them. The making of an annual Atherton memorial day ought surely to be the work now of every succeeding sophomore class.

Through the cooperation of the college and the B. C. R. R., the railroad station and the entrance to

the college will be very attractive to our visitors this commencement. The activity at both these places and at various parts of the campus is to be commended, for it is always the first impression that counts. Heretofore the amount of rubbish at the station and the dirty pile of stones at the entrance were miserable eyesores, but all is being transformed now. The new sod, the new paint and the shrubbery are making a wonderful improvement and are well worth the time and money spent on them.

Senior Exams.

Saturday, May 29, 8:30 a. m.
Political Science 14, 15, rooms 384, 437, 438 Main building.

Monday, May 31, 8:30 a. m.
Hydraulics 12, rooms 18, 19, 20, 21, Engineering building, Metallurgy 6, Mining building.

Tuesday, June 1, 8:30 a. m.

ing; Forestry 12, Forestry building; Zoology 16, room 206 Main; Philosophy 7, Library K.

Friday, June 4, 8:30 a. m. Jurisprudence 1, room 29 Engineering building; Jurisprudence 2, room 20 Engineering building.

The Soils Trip is Finished.

The upperclass students in Horticulture and Soils who left here last Thursday spent the whole of Saturday in the observation of local fruit growers and market gardeners in the vicinity of Moorestown, New Jersey, a community which is the best in the United States so far as fruit and vegetable specialists are concerned. Monday was taken up in the study of greenhouses and their crops in and around Philadelphia, after which the Soils men left for Washington and Baltimore.

The Horticultural section rose early Tuesday morning and went to New York for an inspection of their markets. This was the beginning of a trip extending the length of Long Island for the remaining three days, in a special train supplied by Mr. H. B. Fullerton, a noted specialist of that section. Market gardens, orchards, greenhouses and crops were particularly noted.

Games With Villanova Tomorrow and Saturday.

On Friday and Saturday our baseball team will meet the Villanova nine in two games. It is only too true that the Main Liners, by winning 2 to 1 from Skemp earlier this season, are now ahead in the series of struggles on the diamond. Since 1902 when our first contest with Villanova was played, thirteen close games have taken place between these two rivals and the visitors have won seven of them. Few schools can boast of such a proud record against White and Blue baseball teams and we can put ourselves in the lead by taking two games from the visitors tomorrow and Saturday.
