The Agricultural Society.

The Agricultural Society has organized for the year and is down to regular work, its meetings being held every Monday evening at seven in the Agricultural building. The first session was given over to Dr. Hunt for his annual address to the school of Agriculture. He dwelt upon the healthy growth of the school, both in students and faculty, and upon the prospects and problems of the future. Students engaged in various practical pursuits during the summer have spoken and will continue to do so during the year.

The work of the society should appeal especially to the underclassmen of the school for it deals almost entirely in cultural and purely scientific branches. A man who is to make Agriculture his lifework should not wait till the fourth semester of his course to come in touch with the practical and technical side of the work. The Agricultural Society aims to fill this gap by means of addresses from students who have spent summer months in the field, from members of the faculty, and from men who are successful and prominent in their own lines on the farm and in other colleges. It is hoped that every Farmer and Forester will consider it a duty to himself and his fellows to become a member of the organization and to work faithfully for its advancement.
