THE WRESTLING MATCH.

The Sophomores Win in the Closest and Most Exciting Match Ever Held Here.

In one of the most sensational wrestling meets ever held by under-class teams, the sophomores defeated the freshmen 3-2, last Friday night on New Beaver Field. The match was clean and decisive, but the ever-confident sophomores found a worthy foe in the representatives of 1913. For just two hours and a half, the contestants waged their battle for class honor and supremacy, the final decision resting on the last bout scheduled. To each and every one of the wrestlers great credit and praise is due, for they all displayed the fighting spirit that has ever characterized the State man.

The match began at 8:30 p.m. Amid the riotous cheering from both grandstand and sidelines, the initial performers took their places on the mat. Each bout proved most interesting and displayed the development of the individual men. The freshmen took the 125 lb. and 158 lb. bouts, with straight falls, while 1912 captured the heavyweight with little difficulty. The 135 lb. bouts between Hoskins and Karcher, however, were more difficult to decide, neither contestant landing a fall, the decision resting finally with the judges, who awarded the bout to Hoskins on "superior aggressive-

ness." Boger and Elliott undoubtedly fought the most sensational battle of the evening. They were both evenly matched and each one was fast and eager to take the initiative. Each man had a bout to his credit when they faced each other at the end of the match, and this last bout was to decide the entire meet, as the total score to this point was 2-2. For thirty-three minutes the two men struggled on the mats, lustily cheered by their respective classmates, until finally the deafening and exultant roar from the sophomore ranks, told the story of the end of the 1912-1913 wrestling matches. Summaries are as follows:

Investigations by the Institute of Animal Nutrition.

At the suggestion of The Honorable Asher Miner of Wilkes-Barre, president of the Miner-Hillard Milling company, the Institute of Animal Nutrition will investigate, during the coming season, the nutritive value of hominy feed, a by-product in the preparation of hominy from Indian corn, which is being extensively sold in Pennsylvania markets. Mr. Miner has donated the necessary amount of feed and also, for comparison, an equal amount of corn meal ground from the same corn. He has likewise furnished an interesting suite of samples taken at different stages of the milling process.
