

The : Pennsylvania : State : College

EDWIN ERLE SPARKS, Ph.D., L.L. D., PRESIDENT

Established and maintained by the joint action of the United States Government and the Commonwealth of Pennsylvania

FIVE GREAT SCHOOLS offering twenty-eight courses of four years each—**Liberal Arts, Natural Science, Agriculture, Engineering, Mines and Metallurgy, and Courses in Home Economics, Industrial Art and Physical Education for women**. **TUITION FREE** to both sexes; incidental charges moderate. First semester begins middle of September and second semester the first of February of each year. For catalogue, bulletins, announcements, etc., address **The Registrar, State College, Pennsylvania.**

ALUMNI NOTES.

J. W. Loose '09, is at present with the Western Electric company in Chicago, in the switch-board and cable department. Mr. Loose visited us last week after having come east for the State-Pitt game and his many friends in college tendered him a most cordial reception.

P. P. Reece '07, who has been with the Rock Island Coal company at Hartshorne, Oklahoma, since graduation, has become superintendent of the Compania Carbonifera de Lampacitos, located at Baluarate, Coah, Mexico.

W. G. Heckathorne '06, who is at present with the Milwaukee & St. Paul Railway company, will after Dec. 1, be with the McClintick Marshall Construction company.

H. C. Spryer '09, and J. W. Allen '09, both of the Western Electric company, have been sent to New Orleans to install the company's telephones.

Ira B. Crilly '09, has changed his address from 1806 South Herman street to 2205 Washington Boulevard, Chicago, Ill.

H. W. Bell '09, is with the Pittsburgh Coal company located at Brownsville, Pa.

G. E. McCurdy ex-'04, is resident engineer in charge of track elevation in Chicago, Ill.

H. H. Glenn '09, is in the testing department of the Western Electric company.

F. D. Cooner '09, is rodman with the Gulf, Colorado and Santa Fe Railway company, located at San Angelo, Texas.

John Peabody Moore.

Within the past week the teaching staff of the electrical engineering department has been materially strengthened by the addition of John Peabody Moore.

Mr. Moore is a graduate of the Alabama Polytechnic Institute, having received there his B. S. degree in '98. Since graduation he has been connected with many of the most prominent engineering corporations in the country and has held numerous responsible positions while in their service. Most notable among these were, foreman on railway and power installation at the General Electric company, erecting engineer with the Indianapolis Northern Traction company at Cincinnati, Ohio, and superintendent of distribution of the Des Moines Electric company in Iowa. His experience and wide knowledge of electric railway work assures us of the fact that he will do much toward the furtherance of this subject while with the Pennsylvania State College.

In addition to a new Testing Laboratory, which is nearing completion, Lehigh is to have a Mining Laboratory whose equipment will in many ways resemble the pre-testing plant installed by the bureau of Science of the United States Government at Manila, Philippine Islands.

Miss Thompson Resigns.

It is with a mingled feeling of surprise and regret that the announcement of Miss Thompson's resignation comes to us. For almost five years she has been connected with the Business Office of the College, and every student as well as the professors and instructors fully realize that she is almost invaluable and indispensable. The able manner in which she handles the students at the time of entrance is something wonderful, and her position will be hard to fill. Her resignation took effect December the first.

Cupid again is at the bottom of it all. Sometime in January Miss Thompson will become the bride of Mr. Hall M. Crossman, who graduated from this institution in Mining in 1904. Mr. Crossman is engaged in his chosen work in one of the western states. It is needless to say that we all wish Miss Thompson the greatest amount of happiness possible.

At the meeting of the Debating Society in the Botanical Building on Saturday night at 7 o'clock, K. B. Lohmann '10, will speak on "Scientific Palmistry and its Fallacies." Mr. Lohmann has investigated the subject thoroughly and is sure to give an interesting talk. Everybody welcome.

A course in hygiene has been established at Syracuse. It will be required of all freshmen.
