

Civic Club.

Some forty seniors and juniors were present at the first meeting of the civic club and the interest taken in the movement seems to assure the success of the undertaking. Temporary officers were elected and a committee appointed to draw up a constitution. Prof. Cottrell pointed out many problems in practical politics that the members can study first hand and hinted at certain vital and interesting problems of city government that may be possible subjects for informal discussion at future meetings of the club. Prominent men in active politics will be asked to address the club during the year. Dr Ray expressed his gratification in the interest shown and predicted a bright future for the organization. All who are interested in politics and were not present last week should endeavor to be present tonight at 7:30 when the constitution will be acted upon and permanent officers elected. For the present, meetings will be held twice per month.

Cross Country Run.

The cross country run will be started a few minutes before 2:30 Saturday afternoon, according to the largest handicap. The scratch men will be started at 2:30 sharp. Handicaps will be announced tomorrow. Any handicap runner not on his mark, to be sent off at scheduled time, loses his place and handicap. The course as announced last week, will be followed. The race can be well observed from the top of the Allen street hill. A large entry list points to a fine run, and the work of the men so far gives promise of a hard run for those aspiring for the honors.

Last Thursday evening the varsity football men were very delightfully entertained at the annual dinner given by Dr. and Mrs. Sparks. The men all had a most enjoyable time and express their deepest gratitude for the interest taken in them by this annual occasion.
