

The : Pennsylvania : State : College

EDWIN ERLE SPARKS, Ph.D., L.L. D., PRESIDENT

Established and maintained by the joint action of the United States Government and the Commonwealth of Pennsylvania

FIVE GREAT SCHOOLS offering twenty-eight courses of four years each -- Liberal Arts, Natural Science, Agriculture, Engineering, Mines and Metallurgy, and Courses in Home Economics, Industrial Art and Physical Education for women **TUITION FREE** to both sexes, incidental charges moderate. First semester begins middle of September and second semester the first of February of each year. For catalogue, bulletins, announcements, etc., address **The Registrar, State College, Pennsylvania**

WRESTLING

Our Prospects for a Strong Team Depend on the Students. We Meet Penn Here in January.

For the past few years State has become so well known to the outside world, through the meritorious work of her athletic teams, that it is now of the utmost importance that she be represented in all branches of intercollegiate sports. What we want next is a wrestling team, and we have one, but it is as yet only in its infancy, and to build it up, it is necessary to have the support of the entire student body. The management has arranged a meet with Penn on State's mats for January 22, 1910 and in order to give the team the proper kind of support in this initial meet, it is hoped that every loyal State man will turn out. Negotiations are being completed for meets with Cornell, Princeton, Columbia and Lehigh and this fact alone proves that our other athletic relations with the big colleges and universities have already commanded the attention and respect for a college whose teams are fast, clean and sportsmanlike. At present the wrestling team is an experiment, but we have the determination to make it a successful one and next year it will be absolutely essential that State has a wrestling team under intercollegiate rules.

This brings us to an important

point, namely, if the men are willing to sacrifice other pleasures to build up a team that will bring new laurels to the Blue and White, is it not befitting that they should in some appropriate way be rewarded. The coveted S that our athletes wear, is the recognition of hard labor and utmost effort and is a mark of distinction bestowed upon those who have aided materially in advancing the interests of the college. At the majority of the larger universities, the athletic association awards to the varsity wrestlers, the college letter in connection with the two smaller letters W. T., which distinguishes these men from members of the other varsity teams. This is something for the student body to think over seriously and pass final judgment on after they have seen the fruits of the work done by our new wrestling team.

Assistant Director Lewis is working evenings with the men and although much of his material is green, he is putting forth every effort to make the team one that we can well be proud of. The trials will continue until the time of the first scheduled meet and every man who has had any wrestling experience or who is willing to work and try for the team, is strongly urged to come out. Several men, who were members of last year's wrestling squad are out helping to coach and instruct the new men. The team will especially be strengthened this year in the heavy weight

class by Talbot who came here from Cornell, and his exceptional wrestling ability will aid greatly in the perfecting of this year's team. Keep in mind, fellows, that the meet with Penn is scheduled for the Saturday night during exam week, when some relaxation is an absolute necessity, and turn out strong to cheer your team to victory.

The Senior Foresters.

The Seniors of the Forestry Department of the Pennsylvania State College will spend the month of January in the woods studying the logging methods and the mill work of some lumber operations. This work is done in connection with the course in Lumbering. After studying the principles of harvesting forest crops, the different methods employed in cutting and getting logs out of the woods to the mill and the method of sawing logs up into lumber, a month is spent in the woods where these principles are being actually carried out.

They spend four weeks studying the operation and prepare a report describing the forest region, the methods of logging and milling, and determine the cost of each step in the operation. This report is illustrated by photographs.

I. T. Yarnall and J. R. Brubaker will study the logging operation of the Great Northern Paper Company at Holeb, Maine, on the Kennebec River, where there are eight logging camps in active operation.
